Cracks Of Dawn Selected Articles:

Cracks of Dawn Dawn Holcomb Wilson, 2000 *Selected Letters: 1904-1909* Marcel Proust, 1983 Modi's India Christophe Jaffrelot, 2023-04-11 A riveting account of how a popularly elected leader has steered the world's largest democracy toward authoritarianism and intolerance. Over the past two decades thanks to Narendra Modi Hindu nationalism has been coupled with a form of national populism that has ensured its success at the polls first in Gujarat and then in India at large. Modi managed to seduce a substantial number of citizens by promising them development and polarizing the electorate along ethno-religious lines. Both facets of this national populism found expression in a highly personalized political style as Modi related directly to the voters through all kinds of channels of communication in order to saturate the public space. Drawing on original interviews conducted across India Christophe Jaffrelot shows how Modi's government has moved India toward a new form of democracy an ethnic democracy that equates the majoritarian community with the nation and relegates Muslims and Christians to second class citizens who are harassed by vigilante groups. He discusses how the promotion of Hindu nationalism has resulted in attacks against secularists intellectuals universities and NGOs. Jaffrelot explains how the political system of India has acquired authoritarian features for other reasons too. Eager to govern not only in New Delhi but also in the states the government has centralized power at the expense of federalism and undermined institutions that were part of the checks and balances including India's Supreme Court. Modi's India is a sobering account of how a once vibrant democracy can go wrong when a government backed by popular consent suppresses dissent while growing increasingly intolerant of ethnic and religious minorities. **Book Review Digest**, 1916 **Shattered, Cracked, Or Firmly Intact?** Farida Jalalzai, 2013-03-28 How do men's and women's paths to political office differ? Once in office are women's powers more constrained than those of men? The number of women in executive leadership positions has grown substantially over the past five decades and women now govern in vastly different contexts around the world. But their climbs to such positions don't necessarily correspond with social status and the existence of gender equity. In *Shattered, Cracked, or Firmly Intact* Farida Jalalzai outlines important patterns related to women executives' paths, powers, and potential impacts. In doing so she combines qualitative and quantitative analysis and explores both contexts in which women successfully gained executive power and those in which they did not. The glass ceiling has truly shattered in Finland where to date three different women have come to executive power only cracked in the United Kingdom with Margaret Thatcher as the only example of a female prime minister and remains firmly intact in the United States. While women appear to have made substantial gains they still face many obstacles in their pursuit of national executive office. Women compared to their male counterparts more often ascend to relatively weak posts and gain offices through appointment as opposed to popular election. When dominant women presidents do rise through popular vote they still almost always hail from political families and from within unstable systems. Jalalzai asserts the importance of institutional features in contributing positive representational effects for women.
