*Scandalous Error* C. Philipp E. Nothaft, 2018 The Gregorian calendar reform of 1582 which provided the basis for the civil and Western ecclesiastical calendars still in use today has often been seen as a triumph of early modern scientific culture or an expression of papal ambition in the wake of the Counter Reformation Much less attention has been paid to reform s intellectual roots in the European Middle Ages when the reckoning of time by means of calendrical cycles was a topic of central importance to learned culture as impressively documented by the survival of relevant texts and tables in thousands of manuscripts copied before 1500 For centuries prior to the Gregorian reform astronomers mathematicians theologians and even Church councils had been debating the necessity of improving or emending the existing ecclesiastical calendar which throughout the Middle Ages kept losing touch with the astronomical phenomena at an alarming pace *Scandalous Error* is the first comprehensive study of the medieval literature devoted to the calendar problem and its cultural and scientific contexts It examines how the importance of ordering liturgical time by means of a calendar that comprised both solar and lunar components posed a technical astronomical problem to medieval society and details the often sophisticated ways in which computists and churchmen reacted to this challenge By drawing attention to the numerous connecting paths that existed between calendars and mathematical astronomy between the Fall of Rome and the end of the fifteenth century the volume offers substantial new insights on the place of exact science in medieval culture *Patronage and Humanist Literature in the Age of the Jagiellons* Jacqueline Glomski, Senior Research Fellow Jacqueline Glomski, 2007-01-01 Every epoch has its artists thinkers and creators and behind many of these people there is a patron waiting in the wings *Patronage and Humanist Literature in the Age of the Jagiellons* looks at the relationship between humanist scholars and their patrons in east central Europe during the early sixteenth century It is the first study in English specifically to address literary patronage as it existed in this particular time and place Drawing on the writings of three itinerant scholar poets associated with the courts of Cracow Buda and Vienna Jacqueline Glomski argues that even while they supported the imperial pretensions of the Jagiellonian monarchs the humanist scholars of east central Europe also created effective propaganda for themselves by

representing their own role in the conferring of fame upon their patrons Using a wide array of source material from dedicatory letters to panegyric and political literature Glomski describes how important patronage was to the scholar poets and analyzes the process by which conventions of Renaissance humanism spread across Europe Patronage and Humanist Literature in the Age of the Jagiellons is an insightful historic account that is accessible to anyone interested in patronage at the time of the European Renaissance

**Nicolaus Copernicus** Owen Gingerich, James MacLachlan, 2005-06-16 Born in Poland in 1473 Nicolaus Copernicus launched a quiet revolution No scientist so radically transformed our understanding of our place in the universe as this curious bishop's doctor and church official In his quest to discover a beautiful and coherent system to describe the motions of the planets Copernicus placed the sun in the center of the system and made the earth a planet traveling around the sun Today it is hard to imagine our solar system any other way but for his time Copernicus's idea was earthshaking In 1616 the church banned his book *Revolutions* because it contradicted the accepted notion that God placed Earth in the center of the universe Even though those who knew of his work considered his idea dangerous *Revolutions* remained of interest only to other scientists for many years It took almost two hundred years for his concept of a sun centered system to reach the general public None the less what Copernicus set out in his remarkable text truly revolutionized science For this Copernicus a quiet doctor who made a tremendous leap of imagination is considered the father of the Scientific Revolution

**The Scientific World of Copernicus** B. Biéłowska, 2012-12-06 On February 19 1973 five centuries have elapsed since the birth of Nicolaus Copernicus the greatest astronomer of the Renaissance period who rediscovered for us the heliocentric model of the solar system and documented it by his life's work in such a manner as to make its concept a permanent property of mankind The life of Copernicus extending from 19 February 1473 to his death on 24 May 1543 was not too rich in adventures or biographical facts Born in Toruń from a family of Polish burghers he received his first university training in Cracow between 1491-1494 From Cracow he proceeded to Italy to spend the years between 1496-1503 at the Universities of Bologna Padua and Ferrara with occasional visits to Rome in preparation for an ecclesiastical career When Bishop Watzenrode his patron and maternal uncle could no longer extend his leave Copernicus returned to Poland in 1503 to enter the service of the church establishment which soon led to a canonry at the Frombork Frauenburg Cathedral in Warmia And there in the northern mists not far from the Baltic shores in a land so different in climate from the sunny Italy of his youth he was destined to spend the rest of his life
