with three shorter discussions of Australia Europe and Japan Part Three looks forward to the potential contribution of industrial relations to our understanding of work employment and society by identifying a variety of key dilemmas and debates which call for new interdisciplinary thinking Finally the book ends with a critical reassessment of the industrial relations tradition

Identities and Social Change in Britain Since 1940 Michael Savage, 2010-05-13 Identities and Social Change in Britain since 1940 examines how between 1940 and 1970 British society was marked by the imprint of the academic social sciences in profound ways which have an enduring legacy on how we see ourselves It focuses on how interview methods and sample surveys eclipsed literature and the community study as a means of understanding ordinary life The book is the first to draw extensively on archived qualitative social science data from the 1930s to the 1960s which it uses to offer a unique personal and challenging account of post war social change in Britain It also uses this data to conduct a new kind of historical sociology of the social sciences one that emphasises the discontinuities in knowledge forms and which stresses how disciplines and institutions competed with each other for reputation Its emphasis on how social scientific forms of knowing eclipsed those from the arts and humanities during this period offers a radical re thinking of the role of expertise today which will provoke social scientists scholars in the humanities and the general reader alike

Industrial Ruination, Community and Place Alice Mah, 2012-10-03 Abandoned factories shipyards warehouses and refineries are features of many industrialized cities around the world But despite their state of decline these derelict sites remain vitally connected with the urban landscapes that surround them In this enlightening new book Alice Mah explores the experiences of urban decline and post industrial change in three different community contexts Niagara Falls Canada USA Newcastle upon Tyne UK and Ivanovo Russia Employing a unique methodological approach that combines ethnographic spatial and documentary methods Mah draws on international comparisons of the landscapes and legacies of industrial ruination over the past forty years Through this she foregrounds the complex challenges of living with prolonged uncertainty and deprivation amidst socioeconomic change This rich comparative study makes an essential contribution to far reaching debates about the decline of manufacturing regeneration and identity and will have important implications for urban theory and policy

Identities and Social Change in Britain since 1940 Mike Savage, 2010-05-13 Identities and Social Change in Britain since 1940 examines how between 1940 and 1970 British society was marked by the imprint of the academic social sciences in profound ways which have an enduring legacy on how we see ourselves It focuses on how interview methods and sample surveys eclipsed literature and the community study as a means of understanding ordinary life The book shows that these methods were part of a wider remaking of British national identity in the aftermath of decolonisation in which

measures of the rational managed nation eclipsed literary and romantic ones. It also links the emergence of social science methods to the strengthening of technocratic and scientific identities amongst the educated middle classes and to the rise in masculine authority which challenged feminine expertise. This book is the first to draw extensively on archived qualitative social science data from the 1930s to the 1960s which it uses to offer a unique personal and challenging account of post war social change in Britain. It also uses this data to conduct a new kind of historical sociology of the social sciences one that emphasises the discontinuities in knowledge forms and which stresses how disciplines and institutions competed with each other for reputation. Its emphasis on how social scientific forms of knowing eclipsed those from the arts and humanities during this period offers a radical re thinking of the role of expertise today which will provoke social scientists scholars in the humanities and the general reader alike.

What Really Sank the Titanic: Jennifer Hooper McCarty, Tim Foecke, 2012-03-01 Was the ship doomed by a faulty design? Was the hull's steel too brittle? Was the captain negligent in the face of repeated warnings? On the night of April 14 1912 the unsinkable RMS Titanic with over 2 200 passengers onboard struck an iceberg in the North Atlantic and plunged to a watery grave. For nearly a century the shocking loss has haunted the world. Now the same CSI techniques that are used to solve modern murder cases have been applied to the sinking of history's most famous ship. Researchers Jennifer Hooper McCarty and Tim Foecke draw on their participation in expeditions to the ship's wreckage and experiments on recovered Titanic materials to build a compelling new scenario. The answers will astound you. Grippingly written *What Really Sank the Titanic* is illustrated with fascinating period photographs and modern scientific evidence reflecting the authors intensive study of Titanic artifacts for more than ten years. In an age when forensics can catch killers this book does what no other book has before: fingers the culprit in one of the greatest tragedies ever. A fascinating trail of historical forensics. James R Chiles author of *Inviting Disaster I*. An essential facet of Titanic history. Five stars. Charles Pellegrino author of *Her Name Titanic*. With 16 pages of photos. Strategic and

of selected industries with a broader overview of the national political and industrial situation The resulting work which manages to balance analytical depth with breadth of coverage argues that despite numerous problems and limitations 1930s industrial reorganisation policy was reasonably successful in meeting the limited aims of the government

Understanding Social Inequality Tim Butler, Paul Watt, 2006-12-18 This is a book that should be read by anyone interested in class inequality poverty and politics Actually probably more importantly it should be read by people who think that those things do not matter It provides a wonderful summation of the huge amount of work on these topics that now exists and it also offers its own distinctive perspectives on a set of issues that are despite the claims of some influential commentators still central to the sociological enterprise and indeed to political life Roger Burrows University of York A clear and compelling analysis of the dynamics of social and spatial inequality in an era of globalisation This is an invaluable resource for students and scholars in sociology human geography and the social sciences more generally Gary Bridge University of Bristol With the declining attention paid to social class in sociology how can we analyze continuing and pervasive socio economic inequality What is the impact of recent developments in sociology on how we should understand disadvantage Moving beyond the traditional dichotomies of social theory this book brings the study of social stratification and inequality into the 21st century Starting with the widely agreed fact that the world is becoming more unequal this book brings together the identity of displacement in sociology and the spaces of flow of geography to show how place has become an increasingly important focus for understanding new trends in social inequality
