Making Data Talk David E Nelson,Bradford W Hesse,Robert T Croyle,2009-05-20 The demand for health information continues to increase but the ability of health professionals to provide it clearly remains variable The aim of this book is 1 to summarize and synthesize research on the selection and presentation of data pertinent to public health and 2 to provide practical suggestions based on this research summary and synthesis on how scientists and other public health practitioners can better communicate data to the public policy makers and the press in typical real world situations Because communication is complex and no one approach works for all audiences the authors emphasize how to communicate data better and in some instances contrast this with how to communicate data worse rather than attempting a cookbook approach The book contains a wealth of case studies and other examples to illustrate major points and actual situations whenever possible Key principles and recommendations are summarized at the end of each chapter This book will stimulate interest among public health practitioners scholars and students to more seriously consider ways they can understand and improve communication about data and other types of scientific information with the public policy makers and the press Improved data communication will increase the chances that evidence based scientific findings can play a greater role in improving the public s health

Protecting Individual Privacy in the Struggle Against Terrorists National Research Council,Division on Engineering and Physical Sciences,Computer Science and Telecommunications Board,Division on Behavioral and Social Sciences and Education,Committee on National Statistics,Committee on Law and Justice,Committee on Technical and Privacy Dimensions of Information for Terrorism Prevention and Other National Goals,2008-10-26 All U S agencies with counterterrorism programs that collect or mine personal data such as phone records or Web sites visited should be required to evaluate the programs effectiveness lawfulness and impacts on privacy A framework is offered that agencies can use to evaluate such information based programs both classified and unclassified The book urges Congress to re examine existing privacy law to assess how privacy can be protected in current and future programs and recommends that any individuals harmed by violations of privacy be given a meaningful form of redress Two specific technologies are examined data mining and behavioral surveillance Regarding data mining the book concludes that although these methods have been useful in the private sector for spotting consumer fraud they are less helpful for counterterrorism because so little is known about what patterns indicate terrorist activity Regarding behavioral surveillance in a counterterrorist context the book concludes that although research and development on certain aspects of this topic are warranted there is no scientific consensus on whether these techniques are ready for operational use at all in counterterrorism
