keep the Captain's boat and will return for supplies to set up a satellite relay laser weapon which will serve the terrorist's country. They would keep the gold and also harvest, extract and sell cocaine from the Basin. Then the Assistant Anthropologist will take credit for the discovery of the site; the laser will be installed and the gold will be secretly removed. The assistant anthropologist will be told he will get most of the gold and the credit for the discovery but he will be killed after the others once they discover the City. The plan is that at the end the Financier and the Guide will make it back to civilization with the help of the natives and will be thought to be dead along with the others. What they also didn't count on was the presence of giant killer piranhas in the river around the new location of the famed El Dorado. These piranhas were bred over 500 years ago with the local non-killer Pacu fish, a close relative which feeds on vegetation and also the giant pirarucu fish. The Pacu are much larger than the piranhas, some two to three feet in length but have the same body shape as the piranhas and the pirarucu are one of the world's largest fresh water fish as long as twelve feet in length and weigh several hundred pounds. When they were cross-bred by the local kings who lived in the El Dorado, they eventually became giant killers with Piranha teeth and a taste for flesh but with the length of the much larger pirarucu and the girth of the fat pacu.
