The Minimalist Program has advanced a research program that builds the design of human language from conceptual necessity. Seminal proposals by Frampton Gutmann 1999 2000 2002 introduced the notion that an ideal syntactic theory should be crash proof. Such a version of the Minimalist Program or any other linguistic theory would not permit syntactic operations to produce structures that crash. There have however been some recent developments in Minimalism especially those that approach linguistic theory from a biolinguistic perspective cf Chomsky 2005 et seq that have called the pursuit of a crash proof grammar into serious question. The papers in this volume take on the daunting challenge of defining exactly what a crash is and what a crash proof grammar would look like and of investigating whether or not the pursuit of a crash proof grammar is biolinguistically appealing. *The Publishers Weekly* ,2001 *PC Mag* ,1998-05-05 PCMag.com is a leading authority on technology delivering Labs based independent reviews of the latest products and services.
