Drifting Cities:

A City Consumed Nancy Reynolds, 2012-07-11 Though now remembered as an act of anti colonial protest leading to the Egyptian military coup of 1952 the Cairo Fire that burned through downtown stores and businesses appeared to many at the time as an act of urban self destruction and national suicide The logic behind this latter view has now been largely lost Offering a revised history Nancy Reynolds looks to the decades leading up to the fire to show that the lines between foreign and native in city space and commercial merchandise were never so starkly drawn Consumer goods occupied an uneasy place on anti colonial agendas for decades in Egypt before the great Cairo Fire Nationalist leaders frequently railed against commerce as a form of colonial captivity yet simultaneously expanded local production and consumption to anchor a newly independent economy Close examination of struggles over dress and shopping reveals that nationhood coalesced informally from the conflicts and collaboration of consumers from below as well as more institutional and prescriptive mandates

Drifting Cities Stratis Tsirkas, 1995 This trilogy *The Club* *Ariagni* *The Bat* is the saga of three cities Jerusalem Cairo and Alexandria which are drifting towards chaos in a war torn Middle East At its centre is Manos poet lover of life man of intellect and integrity hero of the Greek war against the Italian invasion now deserting the national army to join the leftists in the clandestine struggle against the Greek fascists and royalists Underground operations lead him from city to city involving him in a chain of shifting and perilous relationships and Manos is forced to choose between his humanist impulses and the brutal dictates of ideological orthodoxy Combining an exotic brilliance of detail reminiscent of Durrell's Alexandria novels with the sweep and historical passion of Malraux Stratis Tsirkas has with *Drifting Cities* established himself as a novelist of international importance

The Fragmentary City Andrew M. Gardner, 2024-05-15 As Andrew M Gardner explains in *The Fragmentary City* in Qatar and elsewhere on the Arabian Peninsula nearly nine out of every ten residents are foreign noncitizens Many of these foreigners reside in the cities that have arisen in Qatar and neighboring states The book provides an overview of the gulf migration system with its diverse migrant experiences Gardner focuses on the ways that demography and global mobility have shaped the city of Doha and the urban characteristics of the Arabian Peninsula in general Building on those migrant experiences the book turns to the spatial politics of the modern Arabian city exploring who is placed where in the city and how this social landscape came into historical existence The author reflects on what we might learn from these cities and the societies that inhabit them In *The Fragmentary City* Andrew M Gardner frames the contemporary cities of the Arabian Peninsula not as poor imitations of Western urban modernity but instead as cities on the frontiers of a global neoliberal and increasingly urban future

[International and Transnational Perspectives on Urban Systems](#) Celine Rozenblat, Denise Pumain, Elkin Velasquez, 2018-05-08 This book reviews the recent evolutions of cities in the world according to entirely revised theoretical fundamentals of urban systems It relies on a vision of cities sharing common dynamic features as co evolving entities in complex systems Systems of cities that are interdependent in their evolutions are characterized in

the context of that dynamics They are identified on various geographical scales worldwide regional or national Each system exhibits peculiarities that are related to its demographic economic and geopolitical history and that are underlined by the systematic comparison of continental and regional urban systems following a common template throughout the book Multi scale urban processes whether local one city or within national systems systems of cities or linked to the expansion of transnational networks towards global urban systems throughout the world over the period 1950 2010 are deeply analyzed in 16 chapters This global overview challenges urban governance for designing policies facing globalization and the subsequent ecological transition The answers which emerge from the diversity of situations in the world add some reflections on and recommendations to the urban system framework proposed in the Habitat III agenda

Now Urbanism Jeffrey Hou, Benjamin Spencer, Thaisa Way, Ken Yocom, 2014-10-10 After more than a century of heroic urban visions urban dwellers today live in suburban subdivisions gated communities edge cities apartment towers and slums The contemporary cities we know are more often the embodiment of unexpected outcomes and unintended consequences rather than visionary planning As an alternative approach for rethinking and remaking today's cities and regions this book explores the intersections of critical inquiry and immediate substantive actions The contributions inside recognize the rich complexities of the present city not as barriers or obstacles but as grounds for uncovering opportunity and unleashing potential Now Urbanism asserts that the future city is already here It views city making as grounded in the imperfect messy yet rich reality of the existing city and the everyday purposeful agency of its dwellers Through a framework of situating grounding performing distributing instigating and enduring these contributions written by a multidisciplinary group of practitioners and scholars illustrate specificity context agency and networks of actors and actions in the re making of the contemporary city

The Situationist City Simon Sadler, 1999-08-18 Simon Sadler searches for the Situationist City among the detritus of tracts manifestos and works of art that the Situationist International left behind From 1957 to 1972 the artistic and political movement known as the Situationist International SI worked aggressively to subvert the conservative ideology of the Western world The movement's broadside attack on establishment institutions and values left its mark upon the libertarian left the counterculture the revolutionary events of 1968 and more recent phenomena from punk to postmodernism But over time it tended to obscure Situationism's own founding principles In this book Simon Sadler investigates the artistic architectural and cultural theories that were once the foundations of Situationist thought particularly as they applied to the form of the modern city According to the Situationists the benign professionalism of architecture and design had led to a sterilization of the world that threatened to wipe out any sense of spontaneity or playfulness The Situationists hankered after the pioneer spirit of the modernist period when new ideas such as those of Marx Freud and Nietzsche still felt fresh and vital By the late fifties movements such as British and American Pop Art and French Nouveau Ralisme had become intensely interested in everyday life space and mass culture The SI aimed to convert this interest into a revolution at the level of the

city itself Their principle for the reorganization of cities was simple and seductive let the citizens themselves decide what spaces and architecture they want to live in and how they wish to live in them This would instantly undermine the powers of state bureaucracy capital and imperialism thereby revolutionizing people s everyday lives Simon Sadler searches for the Situationist City among the detritus of tracts manifestos and works of art that the SI left behind The book is divided into three parts The first The Naked City outlines the Situationist critique of the urban environment as it then existed The second Formulary for a New Urbanism examines Situationist principles for the city and for city living The third A New Babylon describes actual designs proposed for a Situationist City

Drifting Cities (Akybernetes Politeies, Engl.). A Trilogy by Stratis Tsirkas Stratis Tsirkas,1974 **The Cambridge Companion to European Modernism** Pericles Lewis,2011-09-08

A broad accessible account of European modernism as a truly cosmopolitan movement **A New Region of the World: Aesthetics I** Martin Munro,2023-01-15 We are all now entering into a new region of the world which designates its sites on all the given and imaginable expanses and of which only a few had been able to foresee in the distance its wanderings and obscurities This region itself we soon foresee as difficult as it may seem to formulate its partition is mixed in time as much as in space a common site which hides another gap Time has changed and space has changed A steep separation of time and space overwhelming one another A new region that is an epoch mixing all times and all durations an epoch also which is an inexhaustible country accumulating expanses which are looking for other limits in incalculable but always finite number as has been said of atoms we are entering into this new region of the world of totalized space of relativized time where everyone already admits that differences are determinant but most often they refuse to recognize that their sum their realized quantity sketches another Relation quite different because we have so long ignored it but we know that it is made and brewed from inextricable and propitious contaminants And we enter into the Whole World which always for us covers the totality of the world but here it is that this Whole World is also in our actuality another region of the world a whole new region and the world is there it is right here it is ahead of us who say it without saying it while saying it again undertaking a new category of literature None of the regions of the world is really unknown the explorers have driven their trains to their endpoint yet there is another region of the world in the world which we have not traveled so much for we will have to cross it all together it is this very improbable Whole World and a few had knowledge of it Well then the world is completely recognized and the Whole World covers entirely the world however and for us the Whole World is to be discovered and known It is a part of the world which right here transcends the world and designates it **Open File Report** ,1996 **Nuclear Science Abstracts** ,1973

The Oxford Guide to Literature in English Translation Peter France, 2000

Translation has been a crucial process in world culture over the past two millennia and more In the English speaking cultures many of the most important texts are translations from Homer to Beckett the Bible to Freud Although recent years have seen a boom in translation studies there has been no comprehensive yet convenient guide to this essential element of literature in English Written by eminent scholars from many countries the Oxford Guide to Literature in English Translation meets this need and will be essential reading for all students of English and comparative literature It highlights the place of translation in our culture encouraging awareness of the issues raised making the translator more visible Concentrating on major writers and works it covers translations out of many languages from Greek to Korean from Swahili to Russian For some works e g Virgil s Aeneid which have been much translated the discussion is historical and critical showing how translation has evolved over the centuries and bringing out the differences between versions Elsewhere with less familiar literatures the Guide examines the extent to which translation has done justice to the range of work available The Guide is divided into two parts Part I contains substantial essays on theoretical questions a pioneering outline of the history of translation into English and discussions of the problems raised by specific types of text e g poetry oral literature The second much longer part consists of entries grouped by language of origin some are devoted to individual texts e g the Thousand and One Nights or writers e g Ibsen Proust but the majority offer a critical overview of a genre e g Chinese poetry Spanish Golden Age drama or of a national literature e g Hungarian Scottish Gaelic There is a selective bibliography for each entry and an index of authors and translators

Greek Diaspora and Migration since 1700 Dimitris Tziouvas, 2016-04-22

The Greek diaspora is one of the paradigmatic historical diasporas Though some trace its origins to ancient Greek colonies it is really a more modern phenomenon Diaspora exile and immigration represent three successive phases in Modern Greek history and they are useful vantage points from which to analyse changes in Greek society politics and culture over the last three centuries Embracing a wide range of case studies this volume charts the role of territorial displacements as social and cultural agents from the eighteenth century to the present day and examines their impact on communities politics institutional attitudes and culture By studying migratory trends the aim is to map out the transformation of Greece from a largely homogenous society with a high proportion of emigrants to a more diverse society inundated by immigrants after the end of the Cold War The originality of this book lies in the bringing together of diaspora exile and immigration and its focus on developments both inside and

outside Greece Austerity and the Third Sector in Greece Jennifer Clarke, Asteris Huliaras, 2016-03-09 Organised civil society in Greece is generally regarded as weak with rankings for associational density volunteerism and levels of social capital traditionally among the lowest in Europe Austerity and the Third Sector in Greece explores the context behind the statistics and general perceptions of a society of takers not givers Stereotypes of a country living beyond its means have been exacerbated by the Eurozone crisis but since 2008 there has in fact been a great proliferation of organised civil society initiatives in the country Has the financial crisis seen a belated awakening of Greek civil society Offering a broad overview of contemporary civil society in Greece this book explores how various characteristics of the country's socio political context have affected the development of the third sector and examines the effect of the economic crisis on it Expert contributors combine macro level analyses with local case studies to form a fascinating new study on the influences of national and regional context on civil society development Their findings provide not only for a better understanding of similar movements but also contribute to wider academic debates on societal responses to economic crises **Lost Levant** de Borchgrave, Rupert, 2025-09-23 How do we understand the heritage of the Levant In the last few hundred years the centre of cultural innovation has moved inexorably westwards leaving us with too small a grasp of the turmoil out of which our own civilisation grew In 2003 Rupert de Borchgrave set off on a journey of ideas that took him to the much disputed grounds where the ancient world constructed the philosophical religious mathematical and artistic thinking that continues to shape our lives today This book is the product of that journey and the musing that it gave rise to Rebels and Radicals Anthony J. Papalas, 2005-01-01 Icaria a long craggy and destitute isle in the Aegean Sea is visible from Turkey The toil and travail of its people symbolizes the journey all Greek People made to achieve a modern society But unlike other Greeks the Icarians often chose a dead end path Never in agreement with those around them the story of the Icaraians shows the best and the worst of Greek society The Icarians were loyal subjects of the Ottoman Empire who because of poverty and lack of resources were not expected to pay heavy taxes while most Ottoman Greeks were dissatisfied with Turkish rule and dreamed of independence But just before World War I when the Greek government did not want to annex the island because of international complications the Icarians expelled the Turks and demanded inclusion in the Greek State At that time the bulk of the young men were escaping the grinding poverty of the island by immigrating to the United States Although the majority of these men stayed in America and brought wives from the island to the New World they maintained local ties Their influence both positive and negative affected many qualities of Icarian life The Icarians did not find their expectations fulfilled as part of Greece and remained disenchanted with their conditions through the twenties and thirties of the 20th century The forties brought first the Italians then the Germans and finally the British After the turmoil many Icarians supported radical political solutions to their problems sympathizing with a native guerrilla movement and rejecting efforts to improve their island seeing only the great Capitalistic conspiracy at work In the last decades of the 20th century the

Icarians finally entered the modern but at a too rapid rate leaving the people unable to cope with some aspects of modernity Anthony J Papalas has assembled a true peoples history by bringing together unusual documents such as dowry agreements and Ottoman court records memoirs and accounts of Icaria by people who were involved in the events he describes all interwoven with informative and perceptive descriptions from forty years of interviews with Icarians from all areas and conditions Here is a history on the social level not grand politics or great battles but rather the everyday existence and immediate choices which once made shape succeeding events
