**The Automotive Manufacturer**, 1880      **Concept Poems 1** David Hamilton, 2016-06-28 This is a concept book with 110 Concept Poems within. The first three sections reflect the confusion and conflicts in rejection between desire and despair wishful thinking and reality. The variety itself is interesting and the book is divided into sections. The first three related concepts are poetry that grew out of a broken relationship, the separation of soul mates and the sadness that the two who should have been together endured because of the separation. A concept poem is a series of poems connected by subject or a central character arranged or occurring in temporal spatial or other order of succession and can be read as a series. They also have similar recurring images and cross references but within those linking similarities there is inner variety to make it fresh and interesting. The poems occur on a visit to Mount Parnassus to see the Pythian. She presides, introduces the sections and frames the book with a prologue and an epilogue. There are some topical miscellaneous poems in the final section like on beauty from Westminster Bridge and the environment as in the plastic rubbish patches that are floating round the Pacific which are independent of each other. There is a mirror effect, experiences everyone shares where readers can find themselves.
