A presente obra tem por objecto o estudo exaustivo dos Contratos Comerciais em geral incluindo as questões relativas à sua negociação, forma e conteúdo, efeitos transmissórios, modificação e extinção e, em especial, através da análise das grandes famílias contratuais incluindo os contratos mercantis clássicos, os contratos de cooperação empresarial, os contratos de distribuição comercial, os contratos bancários, os contratos financeiros, o contrato de seguro e o contrato de transporte. [Réussir ses affaires aux Pays-Bas](#) Paul Crahay, Joëlle Decharneux, Marie-Claire Nijssen, 2012 [EU Cartel Enforcement](#) Andreas Scordamaglia-Tousis, 2013-08-01 There has been a long standing debate on the compatibility of EU competition law with fundamental rights protection particularly as the latter is enshrined in the due process requirements of the European Convention on Human Rights (ECHR). This book is a signal contribution to that debate. It assesses two questions of paramount concern: first, whether the current level of fundamental rights protection in cartel enforcement falls within the accepted ECHR standards; and second, how the often conflicting objectives of effectiveness and adequate protection of fundamental rights could optimally be achieved. Following a detailed survey of relevant EU institutional substantive and procedural law rules, the author offers a set of persuasive normative responses to both questions. Proceeding from an in-depth analysis of the pertinent rights and legal nature of competition proceedings under EU and ECHR law, the author goes on to examine such elements of the perceived incompatibility as the following: investigatory powers vested in competition authorities, the privilege against self-incrimination, right to privacy, fair trial, probationary requirements, degree of use of presumptions in EU practice, Article 6 ECHR guarantees pertaining to the presumption of innocence, proving coordination of competitive behaviour, proving restriction of competition, admissibility of evidence before EU Courts and the Commission, assessment of the attribution of liability rules, EU fining rules, judicial review of cartel decisions by EU Courts and national sanctioning rules. The author's extraordinarily thorough presentation is rounded off with a remarkably comprehensive bibliography that lists, in addition to books and articles, newspaper articles, EU regulations and directives, soft law guidelines and best practices, EU and ECtHR case law, EU Advocate General opinions, European Commission decisions and European Ombudsman decisions. General conclusions stress the necessity of introducing further reforms to enhance the effectiveness and legitimacy of fundamental rights in the context of competition proceedings. Few books have taken such a thorough and far-reaching approach to the reconciliation of effective public enforcement and fundamental rights or of effective deterrence with the principles of legality and non-retroactivity.

presumption of innocence and ne bis in idem In the depth of its appraisal of the entire spectrum of enforcement components from a fundamental rights perspective the book is without peers It will be warmly welcomed by any parties interested in the intersection of competition law and human rights   **Trade Secrets and Intellectual Property** William van Caenegem,Luc Desaunettes-Barbero,2025-04-23 Trade secrets law is probably the least harmonized part of IP law Nonetheless there is a growing realization that variable rules concerning trade secrets impact investment decisions multinational businesses and hiring policies Recently this realization has resulted in the introduction of a new Trade Secrets Directive in the EU which has harmonized trade secrets law across the Union Nonetheless agreement about the policy underpinnings theoretical basis and economic impacts of trade secrets law remains elusive around the globe Legal approaches vary fundamentally and application of the law is far from uniform Although there has been a recent trend towards strengthening trade secrets protection both in civil and criminal law as it tends to militate against labour mobility freedom to imitate and open circulation of what needs to be known to compete there are many who support a more nuanced approach that emphasizes the benefits of unrestricted information flows for competitive markets Opting for a comparative and critical approach this book proposes a nuanced analysis of the competing theories that underlie trade secrets law its theoretical justifications and the varied doctrinal approaches found around the globe the law in the US the UK France and Germany and the new EU Trade Secrets Directive statute laws international instruments recent court decisions and works of notable scholars in the field topics such as the competition for control over knowledge between employees and employers the growth of industrial espionage country rivalry and third party liability the extent and precise parameters of criminal liability and the policy implications of excessive restrictions on the transfer of employee knowledge and know how This book provides a clear understanding of this multifaceted area of law which is often a fallback or last resort when commercial dealings and relationships go wrong The authors analysis of the underlying policy goals and theoretical dimension of the legal status of trade secrets including choices in relation to the application of criminal law and concepts of property will prove of enormous value to academics
