

Drop City

Paul H. Robinson, Sarah M. Robinson

Drop City:

Drop City T. C. Boyle, 2011-07-01 It is the seventies at the height of flower power Star has just joined Drop City a hippie commune in sunny California living the simple natural life But underneath the drugs music and transcendent bliss she slowly discovers tensions and sexual rivalries that threaten to split the community apart A world away in Boynton a tiny town in the interior of Alaska Sess Harder a pioneer who actually does live off the land hunting trapping and fishing yearns for someone to share the harsh winters with him When the authorities threaten to close down Drop City the hippies abandon camp and head up north to Alaska the last frontier But neither they nor the inhabitants of Boynton are completely prepared for each other and as the two communities collide unexpected friendships and dangerous enmities are born **Drop City** T.

Coraghessan Boyle, 2004 It is the seventies at the height of flower power Star has just joined Drop City a hippie commune in sunny California living the simple natural life But underneath the drugs music and transcendent bliss she slowly discovers tensions and sexual rivalries that threaten to split the community apart A world away in Boynton a tiny town in the interior of Alaska Sess Harder a pioneer who actually does live off the land hunting trapping and fishing yearns for someone to share the harsh winters with him When the authorities threaten to close down Drop City the hippies abandon camp and head up north to Alaska the last frontier But neither they nor the inhabitants of Boynton are completely prepared for each other and as the two communities collide unexpected friendships and dangerous enmities are born *West of Center* Elissa

Author, Adam Lerner, 2012 Recovering the art and lifestyle of the counterculture in the American West in the 1960s and 70s

The 60s Communes Timothy Miller, 2015-02-01 The greatest wave of communal living in American history crested in the tumultuous 1960s era including the early 1970s To the fascination and amusement of more decorous citizens hundreds of thousands of mostly young dreamers set out to build a new culture apart from the established society Widely believed by the larger public to be sinks of drug ridden sexual immorality the communes both intrigued and repelled the American people The intentional communities of the 1960s era were far more diverse than the stereotype of the hippie commune would suggest A great many of them were religious in basis stressing spiritual seeking and disciplined lifestyles Others were founded on secular visions of a better society Hundreds of them became so stable that they survive today This book surveys the broad sweep of this great social yearning from the first portents of a new type of communitarianism in the early 1960s through the waning of the movement in the mid 1970s Based on more than five hundred interviews conducted for the 60s Communes Project among other sources it preserves a colorful and vigorous episode in American history The book includes an extensive directory of active and non active communes complete with dates of origin and dissolution **The City That Became Safe** Franklin E. Zimring, 2013-11 Discusses many of the ways that New York City dropped its crime rate between the years of 1991 and 2000 *Really Free Culture* , **Travel, Space, Architecture** Miodrag Mitrasinovic, 2016-02-17 Travel Space Architecture defines a new theoretical territory in architectural and urban scholarship that frames the

processes of spatial production through the notion of travel By aligning architectural thinking with current critical theory debates this book explores whether dissociating culture from place and identity and detaching the idea of architecture from both can reframe our understanding of spatial and architectural practices The book presents seventeen key case studies from a diverse range of perspectives including historical theoretical and praxis based and range from interrogations of architectural travel and notions of belonging and nationhood to challenging established geopolitical hierarchies

Studies in the History of Services and Construction James Campbell, Amy Boyington, Yiting Pan, Nina Baker, Michael Heaton, Michael Tutton, David Yeomans, Henrik Schoenefeldt, Michael Driver, 2018 Building services are often overlooked in the history of architecture and engineering This volume presents 41 papers presented at the Fifth Annual Conference of the Construction History Society held at Queens College Cambridge from 6-8 April 2018 which cover a wide variety of topics on aspects of construction history and building services

French Encounters with the American Counterculture 1960-1980 Caroline Maniaque-Benton, 2016-12-05 French American interrelationships in the areas of design and creative thinking have been under acknowledged It is normally asserted that French architects looked to North America for technical lessons in the development of modern architecture in the 1960s but that the French cultural environment was generally hostile to American ideas This book includes interviews with French architects who visited the United States in the 1960s 1970s and then assumed influential positions in the press and education in France Some of these architects found in non mainstream America and its radical groups of architectural drop outs a liberating force free of the taint of American capitalism and the high investment technology Often living in alternative student communities they saw highly innovative low cost technical and structural systems placed in the service of collective forms of living which represented a critique not only of professional architectural practice but also of bourgeois forms of living Many of them also studied in American schools of architecture and came in contact with an intellectual and interdisciplinary style of architectural education unavailable in France at that time

Last Futures Douglas Murphy, 2022-07-19 Whatever happened to the last utopian dreams of the city In the late 1960s the world was faced with impending disaster the height of the Cold War the end of oil and the decline of great cities throughout the world Out of this crisis came a new generation that hoped to build a better future influenced by visions of geodesic domes walking cities and a meaningful connection with nature In this brilliant work of cultural history architect Douglas Murphy traces the lost archeology of the present day through the works of thinkers and designers such as Buckminster Fuller the ecological pioneer Stewart Brand the Archigram architects who envisioned the Plug In City in the 60s as well as co operatives in Vienna communes in the Californian desert and protesters on the streets of Paris In this mind bending account of the last avant garde we see not just the source of our current problems but also some powerful alternative futures

For All the People John Curl, 2012-07-01 Seeking to reclaim a history that has remained largely ignored by most historians this dramatic and stirring account examines each of the definitive American cooperative

movements for social change farmer union consumer and communalist that have been all but erased from collective memory Focusing far beyond one particular era organization leader or form of cooperation For All the People documents the multigenerational struggle of the American working people for social justice While the economic system was in its formative years generation after generation of American working people challenged it by organizing visionary social movements aimed at liberating themselves from what they called wage slavery Workers substituted a system based on cooperative work and constructed parallel institutions that would supersede the institutions of the wage system With an expansive sweep and breathtaking detail this scholarly yet eminently readable chronicle follows the American worker from the colonial workshop to the modern mass assembly line from the family farm to the corporate hierarchy ultimately painting a vivid panorama of those who built the United States and those who will shape its future John Curl with over forty years of experience as both an active member and scholar of cooperatives masterfully melds theory practice knowledge and analysis to present the definitive history from below of cooperative America This second edition contains a new introduction by Ishmael Reed a new author s preface discussing cooperatives in the Great Recession of 2008 and their future in the 21st century and a new chapter on the role co ops played in the Food Revolution of the 1970s [A ^AMore Perfect Union](#) Linda Sargent Wood,2012-09-01 This book uncovers a holistic sensibility in post World War II American culture that challenged Cold War logic and fed some of the century s most powerful social movements This impulse is illustrated by focusing on Rachel Carson Buckminster Fuller Martin Luther King Jr Abraham Maslow Pierre Teilhard de Chardin and the Esalen Institute [Reuse of Architectural Components](#) Bailey Bestul,2025-08-29 As the need for a circular construction industry becomes progressively more apparent building practitioners are increasingly turning to salvaged building components to construct new projects Yet the aesthetic potential of reused materials remains underexplored Drawing from art history architectural theory and constructed works this book develops a set of design strategies practitioners might employ to develop thoughtful architecturally rigorous reuse projects Author Bailey Bestul illustrates the immense design potential of reuse using nine themes that follow the reader from the initial stages of building planning to the finishing of the interior spaces Following an overview of the history of component reuse in building design and construction the first part of this book Planning strategies provides recommendations for the integration of scavenged building elements into the larger architectural work From the gap to the wrapper these chapters consider how designers might arrange reused components both to shelter and be sheltered while revealing the age and flaws of these components for maximum design effect The next part Assembly techniques considers how reuse projects might be constructed and the way in which the construction method impacts the architectural proposal Whether framing with sticks or stacking up stones these chapters demonstrate the variety of assembly opportunities available for found object projects Finally the part on Finishing suggests the ways these materials can create experiential spaces that may be variously uniform deeply complex and highly embellished Expanding upon the practical steps

outlined in the technical literature this book provides designers with a set of frameworks for approaching architectural reuse during the more conceptual parts of the design process It is essential reading for professionals interested in integrating reuse in their architectural practice

With Pleasure Anna Katz, 2019-01-01 A timely and expansive survey of a groundbreaking American art movement that overturned aesthetic hierarchies in a riot of color and ornamentation The Pattern and Decoration movement emerged in the 1970s as an embrace of long dismissed art forms associated with the decorative Pioneering artists such as Miriam Schapiro 1923 2015 Joyce Kozloff b 1942 Robert Kushner b 1949 and others appropriated patterns frequently from non Western decorative arts to produce intricate often dizzying or gaudy designs in media ranging from painting sculpture and collage to ceramics installation art and performance This dazzling book showcases an astonishing array of works by more than 40 artists from across the United States examining the movement's defiant adoption of art forms traditionally viewed as feminine craft based or otherwise inferior to fine art In addition to offering an overview of the Pattern and Decoration movement as it is commonly recognized this volume considers artists of the period who are not typically associated with the movement Rethinking the significance of patterns and the decorative in postwar American art this panoramic view provides new insights into abstraction feminism and installation art Essays explore the movement's feminist methods and values including Miriam Schapiro's femmage practice its impact on contemporary abstract painting and its relationship to postmodern architecture and design Artist biographies an exhibition history and reprints of historically significant writings further establish *With Pleasure* as the most expansive publication on the subject

The Cambridge Companion to American Utopian Literature and Culture since 1945 Sherryl Vint, 2024-05-16 Provides an overview of ways that utopian thinking has shaped American culture focusing on the need to remake imperial USA

The Greening of Architecture Phillip James Tabb, A. Senem Deviren, 2017-03-02 Contemporary architecture and the culture it reflects dependent as it is on fossil fuels has contributed to the cause and necessity of a burgeoning green process that emerged over the past half century This text is the first to offer a comprehensive critical history and analysis of the greening of architecture through accumulative reduction of negative environmental effects caused by buildings urban designs and settlements Describing the progressive development of green architecture from 1960 to 2010 it illustrates how it is ever evolving and ameliorated through alterations in form technology materials and use and it examines different places worldwide that represent a diversity of cultural and climatic contexts The book is divided into seven chapters with an overview of the environmental issues and the nature of green architecture in response to them followed by an historic perspective of the pioneering evolution of green technology and architectural integration over the past five decades and finally providing the intransigent and culturally pervasive current examples within a wide range of geographic territories The greening of architecture is seen as an evolutionary process that is informed by significant world events climate change environmental theories movements in architecture technological innovations and seminal works in

architecture and planning throughout each decade over the past fifty years This time period is bounded on one end by the awareness of environmental problems beginning in the 1960 s the influential texts by Rachel Carson E F Schumacher Buckminster Fuller and Steward Brand and the impact of the OPEC Oil Embargo of 1973 and on the other end the pervasiveness of the necessary greening of architecture that includes systemic reforms in architectural and urban design land use planning transportation agriculture and energy production found in the 2000 s The greening process moves from remediation to holistic models of architecture Geographical landscapes give a global account of the greening process where some examples are parallel and sympathetic and others are in clear contrast to one another with very individuated approaches Certain events like the Rio Summit in 1992 and Kyoto Protocol in 1997 and themes such as the Hannover Principles in 2000 provide a dynamic ideological critique as well as a formal and technical discussion of the embodied and accumulative content of greening principles in architecture *The Mobilized American West, 1940-2000* John M.

Findlay,2023-07 John M Findlay presents a historical overview of the American West between 1940 and 2000 arguing that during the years of U S mobilization for World War II and the Cold War the West remained a significant and distinctive region **American Community** Mark S. Ferrara,2020 American Community takes us inside forty of our nation s most interesting experiments in collective living from the colonial era to the present day By shining a light on these forgotten histories it shows that far from being foreign concepts communitarianism and socialism have always been vital parts of the American experience **Understanding T.C. Boyle** Paul William Gleason,2009 Understanding T C Boyle is the first book length study of one of contemporary America s most prolific popular and critically acclaimed fiction writers Inside jacket

Alternative Iran Pamela Karimi,2022-09-27 Alternative Iran offers a unique contribution to the field of contemporary art investigating how Iranian artists engage with space and site amid the pressures of the art market and the state s regulatory regimes Since the 1980s political economic and intellectual forces have driven Iran s creative class toward increasingly original forms of artmaking not meant for official venues Instead these art forms appear in private homes with trusted audiences derelict buildings leftover urban zones and remote natural sites While many of these venues operate independently others are fully sanctioned by the state Drawing on interviews with over a hundred artists gallerists theater experts musicians and designers Pamela Karimi throws into sharp relief the extraordinary art and performance activities that have received little attention outside Iran Attending to nonconforming curatorial projects independent guerrilla installations escapist practices and tacitly subversive performances Karimi discloses the push and pull between the art community and the authorities and discusses myriad instances of tentative coalition as opposed to outright partnership or uncompromising resistance Illustrated with more than 120 full color images this book provides entry into unique artistic experiences without catering to voyeuristic curiosity around Iran s often perceived underground culture

Immerse yourself in heartwarming tales of love and emotion with Explore Love with is touching creation, **Drop City** . This emotionally charged ebook, available for download in a PDF format (*), is a celebration of love in all its forms. Download now and let the warmth of these stories envelop your heart.
