The Psychological Fictions of J.G. Ballard Samuel Francis, 2013-06-20 J G Ballard self-professedly devoured the work of Freud as a teenager and entertained early thoughts of becoming a psychiatrist he opened his novel writing career

with a manifesto declaring his wish to write a science fiction exploring not outer but inner space and declaring the need for contemporary fiction to be viewed as a branch of neurology He also apparently welcomed a reader's report on Crash 1973 condemning him as beyond psychiatric help as confirming his achievement of total artistic success Samuel Francis investigates Ballard's engagement with psychology and the psychological in his fiction tracing the influence of key figures including Sigmund Freud C G Jung and R D Laing and placing his work in the context of the wider fields of psychology and psychiatry While the psychological preoccupations of his writing are very clear including his use of concepts such as the unconscious psychopathology deviance obsession abnormal psychology and schizophrenia this is the first book to offer a detailed analysis of this key conceptual and historical context for his fiction **Literature of an Independent England** C. Westall, M. Gardiner, 2013-07-09 Some of the most incisive writers on the subject rethink the relationship between Britain England and English literary culture It is premised on the importance of devolution the uncertainty of the British union the place of English Literature within the union and the need for England to become a self-determining literary nation

Bridges to Science Fiction and Fantasy Gregory Benford, Gary Westfahl, Howard V. Hendrix, 2018-02-20 The J Lloyd Eaton Conferences on Science Fiction and Fantasy Literature long held at the University of California Riverside have been a major influence in the study of science fiction and fantasy for thirty years The conferences have attracted leading scholars whose papers are published in Eaton volumes found in university libraries throughout the world This collection brings together 22 of the best papers most with new afterwords by the authors presented in chronological order to show how science fiction and fantasy criticism has evolved since 1979 *Inhabitable Infrastructures* CJ Lim, 2017-05-25 *Inhabitable Infrastructures* Science fiction or urban future the follow up to *Food City* and *Smartcities* and *Eco Warriors* from one of the world's leading urban design and architectural thinkers explores the potential of climate change related multi-use infrastructures that address the fundamental human requirements to protect to provide and to participate The stimulus for the infrastructures derives from postulated scenarios and processes gleaned from science fiction and futurology as well as the current body of scientific knowledge regarding changing environmental impacts on cities Science fiction is interdisciplinary by nature aggregates the past and present and evaluates both lay opinions and professional strategies in an attempt to develop foresight and to map possible futures The research culminates in the creation of innovative multi-use infrastructures and integrated self-sustaining support systems that meet the challenges posed through climate change and overpopulation and the reciprocal benefits of simultaneously addressing the threat and the shaping of cities J G Ballard has written that the psychological realm of science fiction is most valuable in its predictive function and in projecting emotions into the future The knowledge from the book is widely transferable constituting both solutions and speculative visions of future urban environments The book is indispensable reading for professionals and students in the fields of urban design architecture engineering and environmental socio-politics Robert Smithson, Land Art, and Speculative Realities Rory

O'Dea,2023-10-23 This book explores the ways Robert Smithson's art revealed and defamiliarized the constructs of rational reality in order to allow radically speculative alternatives to emerge. In this way, his art is conceived as a true fiction that eradicates a false reality. By tracing the web of correspondences between Smithson and science, fictional, speculative, and mystical modes of thought, Rory O'Dea explores the aesthetic encounters engendered by his art as a means to warp the contours of reality and loosen the boundaries of being human. Given the current and impending catastrophes of the Anthropocene, which represents the ever-expanding planetary shadow cast by humanism, the possibility of being other than human posited by Smithson's art is a matter of urgent concern. The book will be of interest to scholars working in art history, contemporary art, American studies, and environmental humanities.
