Enzyme- and Transporter-Based Drug-Drug Interactions K. Sandy Pang,A. David Rodrigues,Raimund M. Peter,2009-12-17 Germination of the thought of Enzymatic and Transporter Based Drug Drug Interactions Progress and Future Challenges Proceedings came about as part of the annual meeting of The American Association of Pharmaceutical Scientists AAPS that was held in San Diego in November of 2007 The attendance of workshop by more than 250 pharmaceutical scientists reflected the increased interest in the area of drug drug interactions DDIs the greater focus of PhRMA academia and regulatory agencies and the rapid pace of growth in knowledge One of the aims of the workshop was to address the progress made in quantitatively predicting enzyme and transporter based DDIs as well as highlighted areas where such predictions are poor or areas that remain challenging for the future Because of the serious clinical implications initiatives have arisen from the FDA <http://www.fda.gov/cber/gdlns/interactstud.htm> to highlight the importance of enzyme and transporter based DDIs During the past ten to fifteen years we have come to realize that transporters in addition to enzymes play a vital role in drug elimination Such insight has been possible because of the continued growth in PK ADME pharmacokinetics absorption distribution metabolism excretion knowledge fueled by further advances in molecular biology greater availability of human tissues and the development of additional and sophisticated model systems and sensitive assay methods for studying drug metabolism and transport in vitro and in vivo This has sparked an in depth probing into mechanisms surrounding DDIs resulting from ligand induced changes in nuclear receptors as well as alterations in transporter and enzyme expression and function Despite such advances the in vitro and in vivo study of drug interactions and the integration of various data sets remain challenging Therefore it has become apparent that a proceeding that serves to encapsulate current strategies approaches methods and applications is necessary As Editors we have assembled a number of opinion leaders and asked them to contribute chapters surrounding these issues Many of these are the original Workshop speakers whereas others had been selected specially to contribute on topics related to basic and applied information that had not been covered in other reference texts on DDI The resulting tome entitled Enzyme and Transporter Based Drug Interactions Progress and Future Challenges comprises of four sections Twenty

eight chapters covering various topics and perspectives related to the subject of metabolic and transporter based drug drug interactions are presented Investing in E-Health: People, Knowledge and Technology for a Healthy Future H. Grain,F. Martin-Sanchez,L.K.
