Wayne Morgan,1982-08-01 Only in the last hundred years have the realities of drug use in America particularly of opiates chloral hydrate cannabis cocaine and the chemical drugs of the twentieth century run counter to a growing country's image of itself as rational efficient and independent In the early and mid nineteenth century the image of the prescribing physician as a reliable figure of authority and knowledge and the widespread use and sanction of opium God's own medicine masked the dangers of addiction and drug abuse But spreading addiction especially among women infants and physicians themselves visible debilitating effects on users and racial stereotyping the Chinese with opium and later blacks with cocaine and Mexicans with marihuana challenged late nineteenth century America's vision of a healthy and productive society Drawing upon a wealth of untapped primary resources Morgan traces changes in the popular attitude toward drug use over the past two centuries the rise of legal restrictions the prolific cure business the idea of drug use as enslaving unamerican and unpatriotic and from the 1920s to the 1950s the linking of drugs with a new spirit of social rebellion The Road of Excess Marcus Boon,2002 From the antiquity of Homer to yesterday's Naked Lunch writers have found inspiration in a world of the imagination tinged and transformed by drugs Drawing on history science biography literary analysis and ethnography Boon shows that the concept of drugs is interdisciplinary and reveals how connections between disciplines configure each drug's unique history 12 illustrations **A Brief History of Drugs** Antonio Escohotado,1999-05-01 A clear eyed look at the instrumental role drugs have played in our cultural social and spiritual development First American publication of the surprising European bestseller Examines everything from the ancient use of ergot and datura to the modern phenomenon of designer drugs such as Ecstasy and crack cocaine From remotest antiquity to the present era of designer drugs and interdiction drugs have played a prominent role in the cultural spiritual and social development of civilizations Antonio Escohotado demonstrates how the history of drugs illuminates the history of humanity as he explores the long relationship between mankind and mind altering substances Hemp for example has been used in India since time immemorial to stimulate mental agility and sexual prowess Aristotle's disciple Theophrastus testifies to the use of datura by the ancient Greeks and further evidence links the rites at Eleusis to the ingestion of a hallucinogen Similar examples can be found in cultures as diverse as the Celts the ancient Egyptians the Aztecs and other indigenous peoples around the world Professor Escohotado also looks at the present day differences that exist between the more drug tolerant societies like Holland and Switzerland and countries advocating complete repression of these substances The author provides a comprehensive analysis of the

enormous social costs of the drug war that is coming under increasing fire from all levels of society Professor Escobedo's work demonstrates that drugs have always existed and been used by societies throughout the world and the contribution they have made to humanity's development has been enormous The choice we face today is to teach people how to use them correctly or to continue to indiscriminately demonize them Just say no the author says is not an option Just say know is Antonio Escobedo is a professor of philosophy and social science methodology at the National University of Distance Education in Madrid Spain He travels widely offering lectures and seminars on the subject of drugs and history

The Political Economy of Narcotics Julia Buxton, 2013-07-04 This book explores the origins history and organisation of the international system of narcotic drug control with a specific focus on heroin cannabis and cocaine It argues that the century long quest to eliminate the production trade in and use of narcotic drugs has been a profound failure The statistics produced by the international and domestic narcotic drug control agencies point to a sustained expansion of the drug trade despite the imposition of harsh criminal sanctions against those engaged as producers traffickers or consumers in the narcotic drugs market The roots of this major international policy failure are traced back to the outdated ideology of prohibition which is shown to be counterproductive utopian and a fundamentally inadequate basis for narcotic drug policy in the twenty first century Prohibition championed by many US policy makers has left the international community poorly positioned to confront those changes to the drug trade and drug markets that have resulted from globalisation Moreover prohibition based approaches are causing more harm than good as is demonstrated through reference to issues such as HIV AIDS the environment conflict development and social justice As the drug control system approaches its centenary there are signs that the global consensus on narcotic drug prohibition is fracturing Some European and South American states are pushing for a new approach based on regulation decriminalisation and harm reduction But those seeking to revise prohibition strategies face entrenched resistance primarily by the U S This important text argues that successive American governments have pursued a contradictory approach acting decisively against the narcotic drug trade at home and abroad while at the same time working with drug traffickers and producer states when it is in America's strategic interest As a result US policy approaches emerge as a decisive factor in accounting for the failure of prohibition
