Teachers at Their Best Rich Waters, 2018-04-03 The purpose of this book is to change the conversation about teacher induction preparation and development and how we create effective teachers Our national discussion about how to create effective teachers needs to move away from how higher education can do a better job preparing our teachers and move toward how our local schools can do a better job inducting preparing and developing our teachers over a full career There are two interconnected and irrefutable reasons for this First school culture supersedes all rational strategies for teacher development and second teachers learn to teach in the schools where they work not in higher education or any of the alternative routes which the ineffectiveness of higher education teacher preparation have caused to emerge With the affirmation of these postulates this book clarifies that teachers are at their best when they are working together in collaborative cultures where teacher thinking and decision making lead schools in continuous improvement and change Elaborating on the importance of these best conditions for optimal teacher development this book will insist that it is the entirety of a school culture that produces effective teachers and schools with authentic learning communities produce the cultures that produce effective teachers

Generation of Teachers looks to serve the many teachers who teach or sponsor classes clubs or conferences for secondary school students who aspire to become teachers Based on the author s research with students in the Tomorrow s Teachers program the book s development is rich with the voices of students and their reflections on how teachers sometimes inspired them to teach and sometimes impelled them to think of new ways to teach Their personal stories as learners will validate all students experiences as it both invites and inspires aspiring teachers in secondary schools to fulfill their dreams by becoming teachers Guided by the learning community concept it presents research and practical activities that will assist teachers and their students in re imagining and re inventing what teachers and schools do It does this as it presents important research on how professional learning communities have the most positive effects on student learning while also empowering teachers to greater job satisfaction Most importantly this book will serve as a practical how to guide so secondary school students can begin to experience working in a professional learning community as they strive to improve the schools they are in right now In doing this the book adheres to the idea that student leadership now is the best preparation for teacher leadership later It will help aspiring teachers move away from the many stale traditions in schooling as they re conceive of the profession in ways that will make it more personally satisfying while acknowledging that the work of teachers in the 21st century must necessarily be different from what we have now legacy practices of standardization left over from the industrial age

The Evolution of Teaching Rich Waters, 2014-10-08 The Evolution of Teaching invites teachers to rethink what teachers and schools do The need to rethink the role of teachers is driven by an abundance of data showing that teachers are increasingly unhappy with their work Most critically they feel a loss of control over their work and their profession as they witness teacher voices being marginalized by impersonal authorities outside of schools who dictate more and more of what teachers and schools must do The antidote to this condition is the evolution of teaching Teachers need to take charge and lead change They need to redefine teaching and schooling in such a way that it authentically supports student learning and teacher

learning They must redefine it in a way that supports every teacher's desire to have a personal impact on students while having control over their own work stakeholder standing as respected professionals and a full career of professional growth As A Guidebook to the Advancement of Teaching Teacher Education and Happier Careers this text will assist teachers in reconceiving the profession of teaching in ways that will make it more personally satisfying while acknowledging that the work of teachers in the twenty first century must necessarily be different from what we have now legacy practices of standardization left over from the industrial age **Middle School Journal** ,2005 **Drumming to the Beat of a Different Marcher Video** ,2003-07-01 In this companion video to her book by the same name Debbie Silver demonstrates why she has become one of the most sought after speakers in the world of education With a strong baseline beat of inspiration and humor Debbie will inspire you to hear the beats of all your different drummers and to differentiate your instruction to meet the needs of all students Fall Down 7 Times, Get Up 8 Debbie Silver,2012-05-22 A fresh approach to getting kids to work smarter and better not just harder Award winning teacher and best selling author Debbie Silver addresses the relationship between student motivation and risking failure calling failure a temporary glitch that provides valuable learning opportunities She explains motivational theory provides down to earth often humorous real life examples and outlines concrete applicable guidelines for helping students overcome setbacks and failure to foster lifelong success Key topics include How to help students become autonomous enthusiastic lifelong learners Why failure is not only an option but a very concrete way of gaining ground The difference between a pep talk and specific relevant feedback that enhances self efficacy *Deliberate Optimism* Debbie Silver,Jack C.
