What Drives Third World City Growth? Allen C. of forces These ranged from open economy effects and natural endowments to the resilient influence of the institutions of the former Dutch Republic and the fiscal policy adopted in response to Belgian secession At the height of the British Industrial Revolution the Dutch economy slowed triggering a return to the problems of eighteenth century stagnation All this meant that the transition to modern economic growth after 1860 came about only in a changed international context and after a period of politico economic reform

The Political Economy of Productivity David H. Feeny, 2011-11-01 The economic history of Thailand between 1880 and 1975 contrasts sharply with the development experiences of other Third World countries Between the opening of trade in 1850 and 1941 when war halted economic activity Thailand became a major exporter of rice in the world market Although conditions for further growth seemed highly favourable Thailand's rapid integration into the world economy failed to improve living standards and rice yields actually declined In examining the causes of the underdevelopment of Thai agriculture over the last 100 years Feeny introduces supply and demand models of technical and institutional change to analyse why the rice export boom did not result in more development This book much of which is based on primary research in the Thai National Archives is one of the few quantitative economic histories of a less developed country

China's Economic Development Cai Fang, 2022-10-20 Cai Fang is one of China's most distinguished economists This book elucidates the worldwide significance of China's economic development over the past 70 years from the perspectives of economic history and growth theory The Chinese economy has undergone an unprecedented period of growth and development since the reform and opening up in the late 1970s a process which the hallmarks of neoclassic economic theory have often proved inadequate to explain Examining the Chinese economy in the light of Chinese history and the development of the world economy as a whole the book charts the milestones and critical reforms of China's economic development providing insights into unique attributes as well as more generic patterns The discussion covers multiple hot topics in the field including the so called Great Divergence dual sector economic development real world experience of the reform and opening up rural reform urbanization economic reform poverty reduction the latter day slowdown of China's economic growth and China's role in and response to globalization global supply domination and other headwinds The book will be a must read for students scholars and general readers interested in the Chinese economy economic development political economy and development economics
