Academic Professionalism In Law Enforcement:

Academic Professionalism in Law Enforcement Bernadette Jones Palombo, 1995 Research in Law Enforcement Selection Michael G. Aamodt, 2004 This book is the most comprehensive reference ever written for individuals interested in law enforcement selection. The chapters contain meta analyses, statistical reviews of the literature investigating the validity of methods used to predict police performance. These methods include education requirements, cognitive ability, background variables, e.g., military experience, arrest record, discipline problems at work, personality inventories, interest inventories, physical agility tests, assessment centers, and interviews. The first chapter in the book is a short primer on meta analysis that informs the reader about the purpose of meta analysis and how to interpret the meta analysis tables contained in the book. Chapter 2 describes the methods used to conduct the meta analyses for this project. Chapters 3-11 list the meta analysis results for the various predictors of police performance. Chapter 12 describes a meta analysis of the relationships among criteria, e.g., performance ratings, discipline problems, commendations. Chapter 13 describes a meta analysis of the relationships among selection methods, and Chapter 14 describes a meta analysis of the relationship between the various criteria and sex, race, age, and tenure. Chapter 15 summarizes the previous chapters and identifies future research needs.
