Resources in Education , 2000-04 Promise and Dilemma Eugene Y. Lowe, Jr., 2021-02-09 Issues of diversity and affirmative action have turned elite higher education in the United States into contested terrain Rights revolutions in the country have raised hopes that have proved difficult to fulfill Most particularly expectations about access and opportunity redressing the unfairness of the past have collided with widely held beliefs that educational institutions

should treat each person fairly as an individual and should promote high academic standards Promise and Dilemma gathers the reflections of a group of leading educators on whether and how objectives of diversity equity and excellence can be simultaneously pursued Empirical in orientation these essays focus on constructive proposals and on the role of social and political consensus Furthermore they contrast what we believe we know with what empirical data and institutional experience can teach us Eugene Lowe s substantive introduction reviews the history of the practice of affirmative action in colleges and universities The other essays are by L Scott Miller of The College Board Mamphela Ramphele vice chancellor of the University of Cape Town Neil J Smelser of the Center for Advanced Study in the Behavioral Sciences Stanford and Claude M Steele of Stanford University Also included are commentaries by Randall Kennedy Harvard Law School Richard J Light John F Kennedy School of Government Harvard University Chang Lin Tien the University of California Berkeley and Philip Uri Treisman the University of Texas The STEM Pathway and Student Retention Carita Harrell,David G.

Capco,2021-03-11 This work introduces methods that aid in freshman retention in the transition from high school and to remain in the university of origin and orient them towards a successful career in science Specific examples of successful approaches are given as well as detailed plans for how to engage these students Pitfalls as well as success are described In addition this work provides a detailed description of how to develop the students into a cohort that exhibits comradery Three types of cohort form those within the freshman class those among the upperclassmen and those between the freshmen and upperclassmen The program works because the social reality is that the peer mentor has a better repertoire with the first semester freshmen than the faculty or staff and assists with student success Factors such as financial aid policy and support systems influence student success In the sciences students often struggle with the content and adjusting to the college experience Research states that a mentorship program supports retention as well as enhances the student experience during college This program creates a cohort group among the upperclassmen mentors and freshmen and provides leadership development for all involved Catholic High Schools and Minority Students ,2002

The effect of Catholic secondary schools on minority students does not occur among students from well educated families who have been successful in their previous education experiences but rather among students disadvantaged by race the fact that their parents did not attend college and by their own previous educational experiences As these schools were originally established at the beginning of the twentieth century to socialize the children of the urban poor their present success with today s urban poor may be due to the fact that these schools are simply doing what they have always done BOOK JACKET

Student Success Lisa M. Nunn, 2014-04-15 The key to success our culture tells us is a combination of talent and hard work Why then do high schools that supposedly subscribe to this view send students to college at such dramatically different rates Why do students from one school succeed while students from another struggle To the usual answer an imbalance in resources this book adds a far more subtle and complicated explanation Defining Student Success shows how different schools foster dissimilar and sometimes conflicting ideas about what it takes to succeed ideas that do more to preserve the status quo than to promote upward mobility Lisa Nunn s study of three public high schools reveals how students beliefs about their own success are shaped by their particular school environment and reinforced by curriculum and teaching practices While American culture broadly defines success as a product of hard work or talent at school intelligence is the talent that matters most Nunn shows that each school refines and adapts this American cultural wisdom in its own distinct way reflecting the sensibilities and concerns of the people who inhabit each school While one school fosters the belief that effort is all it takes to succeed another fosters the belief that hard work will only get you so far because you have to be smart enough to master course concepts Ultimately Nunn argues that these school level adaptations of cultural ideas about success become invisible advantages and disadvantages for students college going futures Some schools definitions of success match seamlessly with elite college admissions definition of the ideal college applicant while others more closely align with the expectations of middle or low tier institutions of higher education With its insights into the transmission of ideas of success from society to school to student this provocative work should prompt a reevaluation of the culture of secondary education

Only with a thorough understanding of this process will we ever find more consistent means of inculcating success by any measure

Minority Student Retention Alan Seidman,2019-05-23 Student retention continues to be a vexing problem for all colleges and universities In spite of the money spent on creating programs and services to help retain students until they achieve their academic and personal goals and graduate the figures have not improved over time This is particularly true for minority students who have a greater attrition rate than majority students Demographic information shows that the minority population in the United States is growing at a faster rate than the majority It is imperative that educational institutions find ways to help improve retention rates for all students but particularly minority students Retention rates should not differ appreciably among different racial ethnic groups The Journal of College Student Retention Research Theory and Practice is the only scholarly peer reviewed journal devoted solely to college student retention It has published many articles on minority student retention and this topic continues to garner much attention This book is a compilation of the very best of these articles selected on the basis of reviews by a cadre of experts in the education field The articles discuss African American Latino Latina Asian and Asian Pacific Native American and biracial students and institutional commitments to retaining a diverse student population For those interested in this vital area the collection will teach and inspire them to achieve greater heights and pay additional attention to retaining minority students in our colleges and universities
