This compilation probably looks like one of the craziest things a human being could spend his or her time on Yet nobody would wonder at someone taking a short walk every day after twenty five years that person would have covered a

surprisingly long distance This is exactly the story behind this list which appeared first as a few pages within the directory StarGuides or whatever name it had at that time and as a distinct sister publication since 1990 The idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations acronyms contractions and symbols which they might encounter in all aspects of the vast range of their professional activities including traveling Perhaps it is a bit paradoxical but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline they will probably encounter more difficulties when dealing with adjacent fields It is for this purpose that this dictionary might be most often used Scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions **Pyramid Response to**

Opportunity, and Success Martha E. Casazza, Laura L. S. Bauer, 2006-01-30 Behind the hallowed walls of higher education are students who did not grow up expecting to attend college students who walked through open doors not knowing what to expect on the other side For some these open doors became revolving doors and they simply gave up For many others however there were unexpected successes successes that included more than academic accomplishments These people came through the system with an increased sense of self confidence that empowered them in the world beyond college This oral history tells the story of the struggles as well as of the triumphs related to the fight for access and high quality in higher education Thus it provides a unique look at the past state of higher education and at the measures that might be taken to improve our future educational system The book begins with a brief historical overview of what access to higher education looked like before the 20th century Following chapters tell the actual stories and are organized around four themes the power of belief in students access with success institutional commitment and effective support systems Finally a set of recommendations is provided that will help to keep the doors open for those still wishing to enter Educators at all levels graduate students studying higher education and interested readers in the general public will all find this book an invaluable resource **The Routledge Encyclopedia of Indian Writing in English** Manju Jaidka, Tej N.
