McLaughlin, Michael J. Cody, Stephen John Read, 2013-12-16 To date the study of communicated explanations has been at best unsystematic There has been little recognition that many if not most explanations are eventually delivered to a hearer or hearers These potential audiences constrain the way the explanation is ultimately shaped Similarly researchers have devoted themselves to the study of accounts for the most part without an accompanying interest in the fundamental processes of event comprehension This volume is devoted to bridging the gap between these two traditions Growth Following Investment and Consumption-Driven Current Account Crises Mr. Alexander Klemm, 2013-10-23 Current account deficits imply increasing liabilities to the rest of the world External sustainability then depends on whether these can be met in the future without defaulting i.e. normally through trade account surpluses To run such surpluses without a fall in consumption capital inflows should be used to increase future output This paper tentatively finds that current account deficits reversals that follow investment booms are marked by better growth performance than those following consumption booms It also shows that many recent large current account deficits have been predominantly the result of consumption or non productive investment booms **Explanations, Accounts, and Illusions** John McClure, 1991-07-25 A survey of the major viewpoints in social psychology concerning peoples self awareness explanations of their actions cognitive illusions and self misunderstandings **The Old Testament Pseudepigrapha** James H. Sustainability: Asia Pacific Perspectives Ki-Hoon Lee, Stefan Schaltegger, 2018-01-30 This book advances the understanding of corporate sustainability and challenges and roles of sustainability accounting in the Asia Pacific region The Asia Pacific region has shown fast economic growth for several decades which is expected to continue In this context Asia has become the production engine of the global economy At the same time scientific reports reveal that some planetary boundaries are crossed for example relating to biodiversity and climate change Companies in the Asia Pacific region are therefore increasingly challenged to reduce their environmental impacts to document their social contribution and to contribute to sustainable development Key approaches to identify sustainability problems and challenges to support improvement processes and to back up sustainability contributions include accounting and reporting In contrast to the high relevance of accounting and reporting for corporate sustainability for the Asia Pacific region academic research has so far been dominated by Western researchers and predominantly dealt with Western and Japanese cases and approaches It is thus time to take account of Asian perspectives on accounting and reporting for sustainability in the Asia Pacific region
