Symposium on Auditing Research ,1992

Accounting and Auditing in China

Mark A. Clatworthy, Juan Manuel García Lara, Edward Lee, 2025-02-12 This book is a curated compilation of research articles exploring compelling issues associated with accounting and auditing in China. China is one of the leading emerging countries in the world. It has experienced rapid growth over the past few decades and plays a key role in the global economy. Accounting information contributes to China's economic development by facilitating the engagement of firms with investors, governmental agencies and other stakeholders. Given the changing regulatory and economic landscape in China, the experiences and challenges of Chinese accounting and auditing offer useful insights to academics, practitioners and policymakers around the world. Against this backdrop, there is an increasingly large and continuously growing academic literature on China-related accounting and auditing. The chapters in this volume showcase how accounting information relates to a wide spectrum of important issues including carbon emissions, international trade and the supply chain. It also considers the development of the audit market in China and highlights important future directions for accounting researchers interested in China-related studies. This book will be relevant for students and professionals of accounting, auditing, finance and international business. It will be particularly useful for researchers, policymakers and practitioners seeking to understand the nuances of China's financial practices and their broader implications. The chapters in this book were originally published in *Accounting and Business Research*.

The Future of Auditing David Hay, 2019-06-20 The *Future of Auditing* provides a concise overview of the function of auditing and the future challenges it faces, underpinned with suggestions for future research. It evaluates the key challenges facing the profession, such as quality, competition and governance, as well as highlighting the under-explored areas of ethics, fraud and judgement. The emphasis throughout is on the value of audit and the importance of auditing research. Providing an original assessment of global versus national auditing, evidence-based auditing standards and the structure of professional firms, David Hay critically examines the value of auditing from different standpoints. He critically reviews current assumptions about the value of audits of financial statements and explores research opportunities and priorities to improve understanding of the value of auditing and its future role and function. This authoritative but accessible guide to the future of auditing and the challenges it faces will be useful not only to auditing researchers but also to policy makers, standard setters, financial journalists and auditing professionals seeking an accessible overview of current and future issues in auditing.

Auditing Lawrence A. Ponemon, David R.L. Gabhart, 2012-12-06 This book has been prepared for those readers who want to maintain their knowledge of current developments in the field of behavioral research as applied to auditing. The articles and papers presented in this volume were selected because they will contribute to the knowledge and advancement of not only the individual researcher or educator but also of the profession. It is our belief that if research endeavors may be viewed as having stages of life, then the field of behavioral research in auditing is in its genesis. Almost twenty years ago, in speaking of the state of the art of psychology, William Hays expressed a most appropriate thought: Experimental evidence is accumulating

at a rapid rate in psychology and efforts at constructing psychological theories with mathematical deductive power are constantly being made. However, it seems safe to say that it will be sometime before there are psychological laws and theories on a par with those of physics. The absence of a general theory does not imply that those relations are missing or unimportant in psychology; the discovery and specification of relations is the process by which those theories are built. Hays 1973 p 40. In the first chapter, Experimental Research and the Distinctive Features of Accounting Settings, Robert Libby presents an encompassing and knowledgeable summary of the changes that have taken place during the last decade in human information processing research in accounting and experimental economics as it relates to those issues.

Accounting and Auditing Practices in Africa Mariaan Roos, Lesley Stainbank, 2017-06-26. This book comprises nine chapters drawn from the papers presented at the fourth annual conference of the African Accounting and Finance Association which took place in Somerset West, South Africa, in 2014. The chapters address a number of aspects of accounting ranging from the adoption of IFRS for SMEs in Africa, the compliance by SMEs with IFRS for SMEs in Ghana, the provision of finance to small businesses, drivers of corporate failures, financial regulations, the audit of casinos, the auditors' report and investment decisions, the role of government audit committees and audit fees and audit quality.
