topics related to sustainability issues in the new era especially in Industry 4.0 or other new manufacturing environments. Under Industry 4.0 there have been great changes with respect to production processes, production planning and control, quality assurance, internal control, cost determination and other management issues. Moreover, it is expected that Industry 4.0 can create positive sustainability impacts along the whole value chain. There are three pillars of sustainability including environmental sustainability, economic sustainability and social sustainability. This Special Issue collects 15 sustainability-related papers from various industries that use various methods or models such as mathematical programming, activity-based costing, ABC, material flow cost accounting, fuel consumption model, artificial intelligence, AI-based fusion model, multi-attribute decision model, MADM and so on. These papers are related to carbon emissions, carbon tax, Industry 4.0 economic sustainability, corporate social responsibility, CSR, etc. The research objects come from China, Taiwan, Thailand, Oman, Cyprus, Germany, Austria and Portugal. Although the research presented in this Special Issue is not exhaustive, this Special Issue provides abundant significant research related to environmental, economic and social sustainability. Nevertheless, there still are many research topics that require our attention to solve problems of sustainability.

China's Anti-monopoly Law in the Digital Era Jingmeng Cai, 2025-08-22. The book aims to depict the whole picture of China's Anti-Monopoly Law (AML) in the digital sector and reveals the three key factors that shape AML enforcement. The author introduces the legal revolution and a major enforcement campaign in the digital sector. She focuses on three typical monopolistic behaviours: abuse of dominant position, merger control and monopoly agreements. High-profile cases such as administrative penalties against Alibaba and Tencent and private lawsuits against Apple and Didi Chuxing are discussed in detail. She also identifies three underlying factors that have influenced AML enforcement reform: the political factor, the legal factor and the academic factor. Finally, the book raises open questions and challenges that are relevant not only to China but to a wide range of jurisdictions. The book will appeal to competition law, antitrust and Chinese law academics, practitioners and officials as well as general readers interested in the subject.

A Handbook On Multidisciplinary Approaches In Research (Volume-1) Er. Sandeep Bishla, Dr. Sahab Ram Kumawat, 2023-04-28. This chapter has a dual purpose. In the first place, the authors provide a real-world example of interdisciplinary research by discussing the two chapter examples they worked on while editing a book full of multidisciplinary cases. The authors' purpose is to provide a realistic picture of how the theoretical aim of interdisciplinary research might be realised in practice in contrast to the numerous theoretical descriptions that have been published on the topic. The author gives the present conceptual understanding of the multidisciplinary before elaborating on the practical use of these ideas in light of the common restrictions that many academics encounter today while undertaking cooperative research. The book provides suggestions on how to improve cross-disciplinary work in the future and share their own experiences conducting interdisciplinary studies. Students' expectations about their own Internet/computer skills and their capacity to complete online courses are explored in this book with research on online education, self-efficacy. The relevance of

culture in the workplace is shown by the fact that several studies have examined the connection between business culture and factors like productivity and lifespan As well as having a significant impact on a broad variety of organisational processes employees performance it has long been seen as a critical component in integrating the various business cultures within corporate group organisation This book aims to chart the history of the electrochemical science from its inception as a separate discipline to the present day Land governance, integrated socio-ecosystem and sustainable development Chen Zeng,Zhen Wang ,Wenping Liu,Qingsong He,Yan Song,Wenting Zhang,2023-06-23
