Accounts of Innocence Joseph E. Davis, 2005 Since a new sensitivity and orientation to victims of injustice arose in the 1960s categories of victimization have proliferated Large numbers of people are now characterized and characterize themselves as sufferers of psychological injury caused by the actions of others In contrast with the familiar critiques of victim culture *Accounts of Innocence* offers a new and empirically rich perspective on the question of why we now place such psychological significance on victimization in people's lives Focusing on the case of adult survivors of childhood sexual abuse Joseph E Davis shows how the idea of innocence shaped the emergence of trauma psychology and continues to inform accounts of the past and hopes for the future in therapy with survivor clients His findings shed new light on the ongoing debate over recovered memories of abuse They challenge the notion that victim accounts are an evasion of personal responsibility And they suggest important ways in which trauma psychology has had unintended and negative consequences for how victims see themselves and for how others relate to them An important intervention in the study of victimization in our culture *Accounts of Innocence* will interest scholars of clinical psychology social work and sociology as well as therapists and victim activists

Ruth Beecher, 2025-05-12 This open access book is an innovative history of community health practitioners responses to the seemingly intractable problem of men and on rare occasions women sexually abusing children within the private family home It is situated within a social history of the development of British community based health professions in the last decades of the twentieth century Drawing on archival research and newly gathered in depth oral history interviews the monograph argues that expectations placed upon community based doctors nurses and mental health staff since the 1980s in relation to predicting and preventing the sexual abuse of children by men they know are incongruous Beneath a surface acquiescence to the need to protect children from such abuse or to intervene early lie cultural social and structural barriers that prevent its fulfilment The book is a first in specifically interrogating the recent history of the role of community health practitioners within the modern child protection workforce and contributes to growing scholarship on the history of emotions in the medical professions The Long Journey Home Andrew J. Neoliberal Sexual Violence Politics Carol Harrington, 2022-06-30 This book locates MeToo's traction among elites with womenomics theories that attribute feminized poverty welfare dependency and sexual violence to traditional femininity and toxic masculinity Such neoliberal anti sexual violence policies seek to empower women through paid work and reform men through fatherhood This volume shows that men's movements and conservative concerns about fatherless families developed toxic masculinity discourse before popular feminism incorporated it It analyses how discourse on MeToo issues in the workplace reveals a shift away from representations of women as traumatized victims in need of empowerment toward a focus on men as both problem and solution setting new standards for masculine workplace conduct However this discourse reproduces a toxic good men binary that serves to consolidate a new form of hegemonic masculinity The book concludes that neoliberal sexual violence politics obscures how globalization fosters inequalities and sexual

violence by blaming these and other social ills on toxically masculine men This book will be of interest to scholars whose research focuses on sexual violence feminist studies masculinity studies and neoliberalism **Media Witnessing** P.

McCorkel,2013-08-05 Since the 1980s when the War on Drugs kicked into high gear and prison populations soared the increase in women s rate of incarceration has steadily outpaced that of men In *Breaking Women* Jill A McCorkel draws upon four years of on the ground research in a major US women s prison to uncover why tougher drug policies have so greatly affected those incarcerated there and how the very nature of punishment in women s detention centers has been deeply altered as a result Through compelling interviews with prisoners and state personnel McCorkel reveals that popular so called habilitation drug treatment programs force women to accept a view of themselves as inherently damaged aberrant addicts in order to secure an earlier release These programs work to enforce stereotypes of deviancy that ultimately humiliate and

degrade the women The prisoners are left feeling lost and alienated in the end and many never truly address their addiction as the programs organizers may have hoped A fascinating and yet sobering study *Breaking Women* foregrounds the gendered and racialized assumptions behind tough on crime policies while offering a vivid account of how the contemporary penal system impacts individual lives Jill A McCorkel is Associate Professor of Sociology at Villanova University
