Bond,Conrad P. Straub,Richard Prober,1972 The editors have attempted to bring together in tabular form the data needed to provide an approach to a solution to environmental problems in air pollution Data are provided on contaminants and pollutants in ambient air and from various industrial operations Control measures found valuable are identified Pref Sources for data are given Indexed Published 1972 1973 CRC Handbook of Energy Efficiency Frank Kreith,Ronald E.

West,1996-10-24 Addressing the needs of engineers energy planners and policy makers CRC Handbook of Energy Efficiency provides up to date information on all important issues related to efficient energy use including Efficient energy technologies Economics Utility restructuring Integrated resource planning Energy efficient building design Industrial energy conservation Wind energy Solar thermal systems Photovoltaics Renewable energy Cogeneration Fossil fuel cost projections The rapid changes that characterize the technology of energy generation systems and the forthcoming competition among energy producers make this handbook a must for anyone involved in the science technology or policy of energy The 53 expert contributors from industry government and universities and the 600 figures and tables make CRC Handbook of Energy Efficiency a professional and valuable resource **CRC Handbook of Tables for Applied Engineering Science** Ray E.

Bolz,2019-03-07 New tables in this edition cover lasers radiation cryogenics ultra sonics semi conductors high vacuum techniques eutectic alloys and organic and inorganic surface coating Another major addition is expansion of the sections on engineering materials and compos ites with detailed indexing by name class and usage The special Index of Properties allows ready comparisons with respect to single property whether physical chemical electrical radiant mechani cal or thermal The user of this book is assisted by a comprehensive index by cross references and by numerically keyed subject headings at the top of each page Each table is self explanatory with units abbreviations and symbols clearly defined and tabular material subdivided for easy reading **U.S. Environmental Protection Agency Library System Book Catalog** United States.

Solid Waste Management Elizabeth M. Thomas-Hope,1998 Solid waste has become a major consequence of development and modernization yet some of the greatest challenges to its management are felt most keenly in the developing countries This is part of the larger paradox of development namely that factors that create the most intransigent problems currently facing the developing countries are invariably those which derive from development itself Introduction This volume presents a collection of papers which with perspectives from Africa and the Caribbean raise critical issues in the

management of solid waste It is intended to offer a basis for discussion among the wide range of disciplines and sectors involved in solid waste management and suggest directions for future work both in the theoretical and practical dimensions of the challenge with which developing countries are confronted

CRC Handbook of Environmental Control Richard G. Bond, Conrad P. Straub, Richard Prober, 1978

Handbook of Groundwater Engineering Jacques W. Delleur, 1998-08-01

This handbook deals with the general field of groundwater from an engineering perspective covering the several disciplines concerned with the design and control of flow and contaminant transport in groundwater Each chapter is authored by a specialist in the topic treated and special care has been taken to keep the literature up to date with recent developments and research in the field An essential reference for advanced undergraduate and graduate students for professional engineers and professionals in government regulatory agencies

Energy Conversion D. Yogi Goswami, Frank Kreith, 2017-07-06

This handbook surveys the range of methods and fuel types used in generating energy for industry transportation and heating and cooling of buildings Solar wind biomass nuclear geothermal ocean and fossil fuels are discussed and compared and the thermodynamics of energy conversion is explained Appendices are provided with fully updated data Thoroughly revised this second edition surveys the latest advances in energy conversion from a wide variety of currently available energy sources It describes energy sources such as fossil fuels biomass including refuse derived biomass fuels nuclear solar radiation wind geothermal and ocean then provides the terminology and units used for each energy resource and their equivalence It includes an overview of the steam power cycles gas turbines internal combustion engines hydraulic turbines Stirling engines advanced fossil fuel power systems and combined cycle power plants It outlines the development current use and future of nuclear power

Sanitary Landfill Leachate Syed R. Qasim, Walter Chiang, 1994-08-12

FROM THE PREFACE Sanitary landfills are the most widely utilized method of solid waste disposal around the world With increased use and public awareness of this method of disposal there is much concern with respect to the pollution potential of the landfill leachate Depending on the composition and extent of decomposition of the refuse and hydrological factors the leachate may become highly contaminated As leachate migrates away from a landfill it may cause serious pollution to the groundwater aquifer as well as adjacent surface waters There is growing concern about surface and groundwater pollution from leachate Better understanding and prediction of leachate generation containment and treatment are needed This book contains a literature review of various methodologies that have been developed for prediction generation characterization containment control and treatment of leachate from sanitary landfills The contents of this book are divided into nine chapters Each chapter contains theory and definition of the important design parameters literature review example calculations and references Chapter 1 is devoted to basic facts of solid waste problems current status and future trends towards waste reduction and recycling Chapter 2 provides a general overview of municipal solid waste generation collection transport resource recovery and reuse and disposal options The

current status of sanitary landfill design and operation problems associated with the landfilling and future trends are presented in Chapter 3 Methods of enhanced stabilization recycling landfill space methane recovery and above grade landfilling and closure and post closure care of completed landfills are also discussed in detail Chapter 4 provides a general overview of Subtitle D regulations and its impact upon sanitary landfilling practices Chapter 5 is devoted entirely to moisture routing and leachate generation mechanisms Examples of calculation procedure for determining the leachate quantity produced at a landfill are presented Chapter 6 is devoted to chemical characterization of leachate that changes over the life of the fill Both theoretical and experimental results are provided to estimate the leachate quality Chapter 7 provides leachate attenuation processes and mechanisms Chapter 8 is devoted to leachate collection systems Natural soil sealants admixed materials and synthetic membranes their effectiveness and methods of installation and economics are fully discussed Chapter 9 provides a detailed review of leachate treatment methodology Kinetic coefficients and treatment plant design considerations are summarized for the sole purpose of assisting consultants to design leachate treatment facilities Leachate treatment case histories and numerous process trains are presented for treating leachate from young landfill The book also describes how the process train can be changed effectively as leachate quality changes with time Incident Mitigation and Treatment Methods ,1987 *Solid Waste Management* Ramesha Chandrappa,Diganta Bhusan Das,2024-03-20 This book discusses solid waste management issues from global to local level It offers an overview of the methods and paradigms of this burgeoning field ranging from generation characteristics quantity and practical challenges The book discusses the major issues with respect to environmental health and economy which are related to solid waste management Furthermore it contains updated information on topics such as toxicology climate change population pressure urbanization energy production building and community design and disaster preparedness in the context of solid waste management

Groundwater Contamination and Remediation Timothy D. Scheibe,David C. Mays,2018-12-07 This book is a printed edition of the Special Issue Groundwater Contamination and Remediation that was published in Water **EPA-600/2** ,1980

Environmental Compliance Handbook, Volume 4 Daniel T. Rogers,2022-11-08 Environmental laws and regulations are extremely complex and difficult to understand In order to comply with them they need to be explained in layperson's terms This handbook identifies many changes in regulations and recommends ways to apply and implement them Containing the latest environmental information this volume goes beyond environmental regulations in two fundamental aspects sustainability and preparation for future requirements before mandates are enacted Structured as a step by step how to book readers will find real life examples for the most important aspects of evaluating sustainability initiatives and preparing for new and revised environmental regulations Features Explores all sustainability related concepts and regulations and the requirement of any control permits available up to date Answers in depth all practical questions that arise when working on compliance projects for future requirements Addresses a wider spectrum of sustainability issues that go beyond chemical

based contamination and environmental regulations and examines the impacts of climate change Includes many real life examples and case studies from industry and institutions that comply with sustainability regulations It is global in coverage and very useful to companies that plan to expand operations outside their country and are interested in future regulations
