Creation The Odyssey Of The Pharaohs:

The Creation Nasser Al-Hazzaa,2000-02-01 *Seeds of Western Culture: Universal Chronology, the Exoduses and Archilochus' Odyssey* Graham Peter Scott,2025-01-01 The book rediscovers two of the main seeds of Western Culture the Exodus and the Odyssey which are entwined within the book by both a common link with Egypt and a review of ancient chronology They were both antecedents to the rise of Christianity which is at the heart of Western Culture It was inspired by a desire to understand the spiritual message of the Odyssey which required both geographical and spiritual interpretations of the poem Linked to this was a desire to understand the political context of the Trojan story which required resolving the false hiatus in the archaeology of Troy This resulted in a new paradigm for understanding ancient chronology which revealed the stories behind the Exodus and the location of the Garden of Eden Writing the book has been a long and eventful journey longer than Odysseus 19 years away from home The book is written in five parts Universal Chronology Based on the identification of Menophres with Thutmose III and of the Bubastite Portal s reference to Shoshenq s participation in the Battle of Qarqar the Egyptian Third Intermediate Period is shortened by 120 years with a pharaoh ruling from Tanis and subordinate kings at Bubastis and Thebes The Exodus Using the Universal Chronology and genealogical information and dates provided by the Bible it is demonstrated that the story of the Exodus is a combination of two events being the exodus of the Hyksos led by Abraham in 1406 BC following the eruption of Thera and the exodus of the Atenist Levite priests led by Moses in about the first year of Tutankhamun 1204 BC The story of Abraham also reveals the location of the Garden of Eden in the heartland of the Levant Radiocarbon Dating The process that created the dendrochronology based radiocarbon calibration curve is demonstrated to be a flawed non scientific process that relied upon circular arguments The Odyssey By comparing the life and work of Archilochus to both the Odyssey and the Iliad it is shown that Archilochus must have been the author of the Odyssey The allegory within the Odyssey is also discussed to provide both geographical and spiritual interpretations of the poem Western Culture The two main streams of Western Culture Ancient Greece and Christianity are shown to have had their foundations in the stories surrounding the Trojan War the spiritual message of the Odyssey and the influences of Egypt on Greece and Judaism It is shown how Greek and Jewish religions were fused to create the Gospels and contributed towards modern astrology Publishers' Trade List Annual, 1999 R R Bowker Publishing,Bowker,1999-09

Pharaoh's Last Testament Jacob G. Ghazarian, 2021-04-19 Joseph John Campbell the eminent comparative mythologist had once posed the question What is the meaning of a flower in a field and why was it there Drawing upon this theme the author explores the origins of faith and belief and presents the narrative of the book as a series of dialogues amongst a number of key characters The protagonist is a young university student whose life s journey is moulded by the words of his mentor who offers the thoughts of Aristotle and St Thomas Aquinas and many other pre and post Socratic Greek philosophers to arrive at conclusions about faith morality and in the search of the divine

The Virtuous Physician Elliott Martin, 2023-11-25 The Virtuous Physician A Brief Medical History of Moral Inquiry from Hippocrates to COVID 19 traces the origin and development of practical moral inquiry as viewed through a lens of medical history The cornerstone of the book is a translation of and commentary on the second century BC pseudo Hippocratic Greek text Precepts a work not translated into English since 1921 which introduces the idea of the virtuous physician and the art of medicine Precepts describes the ideal way of being of the physician and a pragmatic very modern code of ethics Through the examination of other early texts the book locates the physician as a seminal figure in ancient society first with religious significance and later with increasingly philosophico intellectual meaning the physical embodiment of the search for moral pragmatic professional standardization This inquiry is put to the test as applied to the existential threat and crisis of the COVID 19 pandemic The new updated translation of Precepts makes the book interesting to classicists and the detailed discussion of the cross cultural influences between East and West in the Ancient World especially of the influence of the Ancient Near East on Greek and Roman thought to historians It provides an outline of the history of the field for bioethicists and biomedical ethicists and a seminal reference piece for physicians from which to ground their own daily decision making It can be seen as a more valuable guide than the Hippocratic Oath in this regard

The Life Cycle of Civilizations Stephen Blaha, 2002 This book is an expanded version of The Rhythms of History the book that made macro History into a semi quantitative Science New features include 1 an appendix showing how the history of Mayan civilization conforms to the book s Theory of Civilizations including the latest information from the newly discovered hieroglyphic texts at Dos Pilas Guatemala

2 an appendix on the sub Saharan African civilization Great Zimbabwe showing it fits the theory 3 a comparison of the theory with Toynbee s observations showing the many new features resulting from a quantitative theory 4 numerous historic pictures and illustrations of the civilizations of Mankind including a number of newly found pictures from the nineteenth century 5 a chapter describing the potentially disturbing implications of patterns in civilizations Are we free and the implications for the Philosophy of History and 6 expanded comments in many sections such as the sections on the future of Humanity the role of China and the Islamic West conflict The book begins with a hard hitting tell it like it is chapter on the current international situation with statements such as The United States and Western civilization is now engaged in a small Vietnam style war on a global scale at the time of this writing This war is still in the early stages of development The attack on the World Trade Center by Muslim terrorists may have the same significance for Western civilization that the Gothic invasion of Rome itself in the prime of the Empire the First Century AD had for the future of Rome They may be a premonition of things to come not necessarily soon but perhaps in a few centuries The Goths returned three centuries later and remained as permanent conquerors Over the long term the West must free itself from a dependence on Muslim oil Muslim oil revenues are the fuel for the development of weapons of mass destruction by Iran and Iraq In the future they will supply the revenues of an expansionist Islam As the silk trade looted the Roman Empire of its gold and reduced its economy the trade in oil is looting the West of its prosperity and freedom of action The rise and fall of oil prices has a significantly greater effect on the American and world economy than the raising and lowering of interest rates by central banks The book then describes a theory of civilizations that led to these observations Currently unfolding events seem to be fulfilling the predictions which were made last year including the new North Korean threat that seems to be consistent with a predicted breakdown in Japan North Korea will create major problems with Japan As this is being written Japan is moving Aegis destroyers nearer to North Korea and preparing for defense THE EVENTS DESCRIBED IN THIS BOOK AND ITS PREDECESSOR APPEAR TO BE HAPPENING AS PREDICTED LAST YEAR According to Theory of Civilizations the basis of civilizations was laid with a genetic mutation found by Ding et al 40 000 years ago that created bold enterprising individuals who became the leadership group of civilizations a group that Toynbee called the creative minority When the world s climate became warmer and more stable 10 000 years ago the seeds of civilizations began to germinate Thus the origin of civilizations is tied to human genetics The book then shows that a long term social behavior pattern of mankind based on four generation trends causes civilizations to develop and oscillate in patterns of routs and rallies Civilizations rise and fall due to their internal human dynamics The theory of civilization is developed using equations and 68 diagrams that show a close detailed match between the theory and the actual history of all known Asian European and African civilizations over the last 5 500 years The theory projects the future of today s civilizations including the future of Western and Islamic civilizations It also successfully describes the interaction of barbarians and civilizations the interaction of two civilizations the impact of

modern technology on civilizations it accounts for the Luddite reaction to the Industrial Revolution the impact of major environmental events on civilizations e g the collapse of Minoan civilization due to a volcanic eruption and the disintegration of civilizations It also accounts for the tremendous growth phases seen in many civilizations such as the building of the great pyramids in Egyptian civilizations Based on the theory fifteen new civilizations are identified including new prehistoric Chinese and Egyptian civilizations Having shown the success of the theory for earth civilizations it considers the form of extraterrestrial civilizations and calculates their impact on Western civilization should contact be established The book also shows the need for the colonization of space and nearby planets if mankind is to progress in the future The book analyzes the impact of the lengthening life spans of mankind on the future of civilizations Predictions are made for the state of the world for 2050 and 2100 A detailed understanding the past enables the theory of civilizations to make predictions for the future Defining Progress to be the sum of the world s civilizations the book shows that Progress seems to be approximately linearly increasing over the last 5 500 years A plot of Progress appears on the book s cover shown on this web page together with the contributions of each civilization to Progress The vertical order of the civilizations in the plot is arbitrary Older civilizations tend to be lower in the plot The book is a tour de force that makes History a Science rather than a collection of random events It is the first detailed mathematical treatment of history Although the book contains mathematics it is intended for the general reader as well as the mathematically inclined There are copious verbal descriptions of the theory as well as many figures plotting the theory versus historical events A qualitative descriptive theory of civilizations is also presented that is like a Dow Theory of Civilizations

History as Apocalypse Thomas J. J. Altizer, 1985-01-01 History as Apocalypse is a reenactment of the history of the Western consciousness from the Homeric and Biblical revolutions through Finnegans Wake This occurs through a historical literary and theological analysis of the Christian epic tradition While attention is focused primarily upon Dante Milton Blake and Joyce the Classical and Biblical foundations of the Christian epic are explored with the intention of discovering an organic unity in the evolution of the Western consciousness Our primary epics are identified as revolutionary breakthroughs not only as transformations of consciousness but also records of social revolutions The Christian epic is both a consequence and a primary embodiment of the decisive historical revolutions revolutions culminating with the ending of our historical evolution
