**THE KEY TO DREAMS or Dialogue with the Good GOD** Alexandre Grothendieck, The Book As we have seen Grothendieck is the author of a considerable body of mathematical work But he is also the author of significant literary works Among them is R S which was published by Gallimard in January 2022 after having been widely distributed on the internet since Grothendieck first wrote the text in 1986 Amounting to more than 1 900 pages the book deals with many subjects the author's journey as a mathematician his passions his illusions and disillusiones the process of creation and a thousand other topics It also includes long passages on Yin and Yang feminine and masculine ways of doing mathematics the mother the father and child dreams and so on A large part of the text is devoted to a revelation he is said to have experienced in 1976 and a long period of meditation that followed It is a kind of self analysis tinged it has to be said with a certain degree of paranoia A recurring theme is the sense of betrayal he felt toward his former students which is manifested in his work being ignored and forgotten The words funeral deceased hearse massacre and gravedigger and so on quickly become omnipresent after their appearance in the table of contents More generally the book denounces a loss of ethics among the entire mathematical community Grothendieck explains to the reader that mathematics was better before that is prior to 1960 as if the older generation was irreproachable In fact on the contrary it can be said that mathematicians have become much more honest since the 1990s The source of this miracle has a name arXiv It is now becoming ever more difficult to appropriate the ideas of others although of course it is still possible to some degree The institution of mathematics itself has also been greatly improved or at least has been greatly transformed The system of mandarins that dominated French mathematics until the 1970s from which Grothendieck did not experience any difficulties and about whom he does not say a word has practically disappeared Grothendieck who is very self critical throughout the text sometimes ponders whether he might have been arrogant or even contemptuous of those around him during his heyday in the 1960s and 1970s Despite these concerns it is

clear that he cares little about ingratiating himself with his readers. Instead he offers a book of more than 1 900 pages while in response to a question about the IHES library in its early days he remarks 'We don't read books we write them'.

18 R S contains many contradictions that are only partly corrected by a series of Notes, some of which, despite being of particular importance, are not included in this new edition. Addressing these contradictions properly would undoubtedly have required the text to be completely rewritten. Grothendieck is not paralyzed by any sense of false modesty. The thing that struck me is that I do not remember having known even from the allusions of friends or colleagues who are better versed in history of a mathematician apart from myself who contributed such a multiplicity of innovative ideas, not more or less disjointed from one another but as part of a vast unifying vision as was the case for Newton and for Einstein in physics and cosmology and for Darwin and for Pasteur in biology.

19 Elsewhere he writes 'It would seem that as a servant of a vast unifying vision born in me I am one of a kind in the history of mathematics from its origin to the present day'.

20 Although the writing style is not lacking in inspiration, it is nonetheless uneven and sometimes deliberately familiar. Grothendieck is not le duc de Saint Simon. The following analysis will focus only on the content concerning mathematics and the world of mathematicians.

In the text Grothendieck complains at length that his ideas have been plundered by his former students without reference to their master or that they have simply been erased and forgotten. These assertions are not always supported by solid arguments or precise references. But above all it is the nature of discoveries to be trivialized and their author forgotten, and all the more so when the underlying ideas are often in hindsight obvious.

Grothendieck's reproaches are addressed to all his pupils and particularly to Deligne, whose name is almost always preceded by the words 'my friend', insinuating my former friend and to Verdier. It is quite possible to imagine that Deligne was only lightly involved with Grothendieck's authorship of the motives or that the Verdier duality already mentioned could just as well be called the Grothendieck duality. But otherwise everyone knows that it was Grothendieck who invented schemes, motives, Grothendieck topologies, topoi, and above all that he imposed the functorial point of view via the six operations and the derived categories. Everyone knows that it is thanks to the machinery devised by Grothendieck that Deligne was able to prove Andr Weil's last conjecture.

In support of his claims about the total loss of ethics in the mathematical community from the 1970s onwards, Grothendieck's entire argument is based on the unique testimony of one and only one mathematician who came to see him several times at his home in the countryside. It is common practice in ethnology to rely on an informant from the group being studied and who speaks the language. The problem is that the informant may not always be all that reliable and can in fact say anything. Here it is an even worse situation since the informant declares himself to be the first person affected by the story he is going to tell, namely the Riemann-Hilbert correspondence.

**Narratology Beyond the Human** David Herman, 2018 To what extent and in what manner do storytelling practices accommodate nonhuman subjects and their modalities of experience and how can contemporary narrative study shed light on interspecies interactions and entanglements In *Narratology beyond the Human* David Herman addresses these questions through a cross disciplinary approach to post Darwinian narratives concerned with animals and human animal relationships Herman considers the enabling and constraining effects of different narrative media examining a range of fictional and nonfictional texts disseminated in print comics and graphic novels and film In focusing on techniques such as the use of animal narrators alternation between human and nonhuman perspectives the embedding of stories within stories and others the book explores how specific strategies for portraying nonhuman agents both emerge from and contribute to broader attitudes toward animal life Herman argues that existing frameworks for narrative inquiry must be modified to take into account how stories are interwoven with cultural ontologies or understandings of what sorts of beings populate the world and how they relate to humans Showing how questions of narrative bear on ideas of species difference and assumptions about animal minds *Narratology beyond the Human* underscores our inextricable interconnectedness with other forms of creatural life and suggests that stories can be used to resituate imaginaries of human action in a more than human world

**Becoming** Deldon Anne McNeely, 2010 *Becoming* An Introduction to Jung s Concept of Individuation explores the ideas of Carl Gustav Jung His idea of a process called individuation has sustained Deldon Anne McNeely s dedication to a lifelong work of psychoanalysis which unfortunately has been dismissed by the current trends in psychology and psychiatry Psychotherapists know the value of Jung s approach through clinical results that is watching people enlarge their consciousness and change their attitudes and behavior transforming their suffering into psychological well being However psychology s fascination with behavioral techniques made necessary by financial concerns and promoted by insurance companies and pharmaceutical companies has changed the nature of psychotherapy and has attempted to dismiss the wisdom of Jung and other pioneers of the territory of the unconscious mind For a combination of unfortunate circumstances many of the younger generation including college and medical students are deprived of fully understanding

their own minds Those with a scientific bent are sometimes turned away from self reflection by the suggestion that unconscious processes are metaphysical mumbo jumbo Superficial assessments of Jung have led to the incorrect conclusion that one must be a spiritual seeker or religious in order to follow Jung s ideas about personality Becoming is an offering to correct these misperceptions Many university professors are not allowed to teach Jungian psychology Secular humanism and positivism have shaped the academic worldview therefore investigation into the unknown or unfamiliar dimensions of human experience is not valued But this attitude contrasts with the positive reputation Jung enjoys among therapists artists of all types and philosophers Those without resistance to the unconscious because of their creativity open mindedness or personal disposition are more likely to receive Jung s explorations without prejudice or ideological resistance There is a lively conversation going on about Jung s ideas in journals and conferences among diverse groups of thinkers which does not reach mainstream psychology Becoming is for those whose minds are receptive to the unknown and to help some of us to think more with respect than dread of the possibility that we act unconsciously
