of San Pedro Chenalh to address the issues of women's identities, roles, relationships, and sources of power. She explores various personal and social strategies women use to avoid problem drinking, including conversion to Protestant religions, membership in cooperatives or Catholic Action, and modification of ritual forms with substitute beverages. The book's women-centered perspective reveals important data on women and drinking not reported in earlier ethnographies of Highland Chiapas communities. Eber's reflexive approach, blending the women's stories, analyses songs and prayers with her own and other ethnographers' views, shows how Western individualistic approaches to the problems of alcohol abuse are inadequate for understanding women's experiences with problem and ritual drinking in a non-Western culture. In a new epilogue, Christine Eber describes how events of the last decade, including the Zapatista uprising, have strengthened women's resolve to gain greater control over their lives by controlling the effects of alcohol in the community.
