Drug Use Around The World:

Mental Disorder Around the World Kate M. Scott, Peter de Jonge, Dan J. Stein, Ronald C. Kessler, 2018-01-04 This unique book presents original research from the largest cross national survey of the epidemiology of mental disorders ever conducted. It provides the latest findings from the WHO World Mental Health Surveys based on interviews of nearly 150 000 individuals in twenty six countries on six continents. The book is ordered by specific disorder with individual chapters dedicated to presenting detailed findings on the prevalence, onset, timing, sociodemographic profile, comorbidity, associated impairment, and treatment for eighteen mental disorders. There is also discussion of important cross national consistencies in the epidemiology of mental disorders and highlighting of intriguing patterns of cross national variation. This is one of the most comprehensive summaries of the epidemiology of mental disorders ever published, making this an invaluable resource for researchers, clinicians, students, and policy makers in the fields of mental and public health.

Illicit Drug Policies, Trafficking, and Use the World Over Caterina Gouvis Roman, Heather Ahn-Redding, Rita J. Simon, 2007-01-01 Focusing specifically on cannabis, cocaine, and heroin, the contributors to this volume present a brief history and analysis of the current laws and policies regarding illicit drugs, widely considered to be a growing international health threat in 25 different countries. *Illicit Drug Policies, Trafficking, and Use the World Over* provides a wide breadth of valuable data and analysis for both scholars and students of this seemingly intractable social, legal, and political problem.

Two Worlds of Drug Consumption in Late Modern Societies Jacek Moskalewicz, 2017-10-24 *Two Worlds of Drug Consumption in Late Modern Societies* reports the findings of an empirical study of drug users in London, Amsterdam, Turin, Prague, Vienna, and Warsaw. European cities representative of a wide range of drug problems and public policies. The innovative study reconceives the standard distinctions between hard core and recreational drug users in terms of their social position. The authors argue that this is closely related to consumption patterns rather than drug choice and reveals that 2 relatively homogenous drug worlds exist within each of the study sites. This leads to the development of diverging drug markets: a friendly market for the integrated consumer and a highly commercialized one for the marginalized customer where low quality goods are sold at a higher price. These findings have significant implications for academics and professionals working in health, psychology, and urban studies.
