Drum Into Silence:

Drum Into Silence Jo Clayton, Kevin Andrew Murphy, 2004-02-01 The Drums of Chaos thunder to a shattering crescendo. The two worlds of Glandair and Iomard move magically together once every generation, allowing those with special powers to walk between the worlds. This is a dangerous time when the worlds can be destroyed or renewed. On Iomard, Cymel's father has been murdered by the images, and she has been trapped in the body of a white bird. Her other-world companion Breith has crossed from Glandair to rescue her. Lyanz, the only one who can save his world from the coming chaos, is sequestered far away. But if he is to be of any use in the upcoming conflict, he must leave his safe haven behind. Bestselling author Jo Clayton died before she could complete her masterwork, the Drums of Chaos series. Her friend and protégé, Kevin Andrew Murphy, a successful author himself, has worked closely with the outline and early chapters she completed. The result is a satisfying conclusion to this irresistible tale.

Music From the Forest I Died in, Distant Drums of Silence Fred Van Oystaeyen, 2025-04-01 Music From the Forest I Died in Distant Drums of Silence is a collection of poems in which thoughts, emotions, and reflections are interwoven in a whirlwind of words and verses that captivate the reader, accompanying and inviting him to personal reflection. The collection is divided into two parts: the first, more traditional in its structure, while the second is bolder, both in its organization and in the way the poet approaches the themes. The entire collection, in any case, vibrates to the sound of the verses that compose it, which somehow, although dealing with different themes, seem to be held together by a single thread: what makes us human, that is, man's ability to adapt to life, its changes, and challenges without ever losing hope. Fred Van Oystaeyen is a prolific mathematician, having published over three hundred scientific papers and fifty books, monographs, and congress proceedings; he also authored a novel, Irritation of the Eye in Darkness, and the science philosophy book Time Hybrids. As a child, he initiated the practice of writing short stories and poems, frequently incorporating a humorous element or a philosophical concept. Later in life, he elevated this pastime to a more serious level, occasionally sharing his work on social media but refraining from seeking publication. He received several awards in mathematics, including honorary professor in Beijing, doctor honoris causa in Almería, Spain, and the Free University of Brussels, Belgium. As a mathematical poet, he aims to write poetry with some fundamental humanistic meaning, creating hidden order in chaotic emotions and erratic processes in life, which flow into a vast delta of death but with some joy and fun.
