Duality Of Human Existence Isolation Communion In Western Man:

The Duality of Human Existence David Bakan, 1966 *Women and Sacrifice* William Beers, 1992 *Women and Sacrifice* is an original and lucid book that explores the anthropology and developmental psychology of male violence in blood sacrifice and its implications in religion and culture. It is the first comprehensive study of the psychology of gender and religion using the controversial ideas of Heinz Kohut and self psychology. Beers not only makes an important contribution to our psychological understanding of sacrifice, he explores how narcissistic anxiety fuels rituals and social structures that subordinate women. He bases his provocative theory on three general premises: sacrifice is traditionally performed only by men; the gender specificity of sacrifice can be traced to gender-specific developments of men and women and is reflected in religions throughout the world; and the male violence of sacrifice is related to other forms of male violence. Beers reviews the theories of symbol formation of Freud, Jung, Klein, and Winnicott and argues that Kohut's self psychology is more appropriate for understanding the psychology of symbolic ritual. The psychological claims in the book are presented in the context of social structures, cultural expressions, and individual and group history. Beers includes critiques of such leading theorists of ritual and sacrifice as Durkheim, Levi Strauss, Douglas Turner Geertz, Freud, Jung, and Girard. In analyzing sacrifice among the Malekulans of Melanesia and the eucharist of the American Episcopal Church, Beers develops the theory that such rituals have a psychological function that diminishes and controls women. He claims that men so fear women that religious ritual excludes women in order that men can gain and retain power over them. BOOK JACKET Title Summary field provided by Blackwell North America Inc. All Rights Reserved **Sex/Gender** Maximilian T. P. von Andrian-Werburg, 2024-05-21 Few topics have been the subject of more controversy than those encapsulated by the terms sex and gender. Social, cultural, and biological evolutionary argumentation patterns frequently clash, and especially the public debate appears to be stuck in a stalemate between the two competing parties. From a psychological perspective, both topics appear deeply intertwined and are not easy to be separated. This study pursues an integrative approach to better understand the roots of differences best subsumed under the term sex/gender. It will become apparent that both nature and nurture variables interact and form the complex system of human behavior and experience **Personality Psychology** David M. Buss, Nancy Cantor, 2012-12-06 Research in the field of personality psychology has culminated in a radical departure. The result is *Personality Psychology: Recent Trends and Emerging Directions*. Drs. Buss and Cantor have compiled the innovative research of twenty-five young outstanding personality psychologists to represent the recent expansion of issues in the field. Advances in assessment have brought about more powerful methods and the explanatory tools for extending personality psychology beyond its traditional reaches into the areas of cognitive psychology, evolutionary biology, and sociology. This volume represents a significant landmark in the psychology of personality *The Infanticidal Logic of Evolution and Culture* A. Samuel Kimball, 2007 This book argues that because existence costs, the two words are cognates: any living thing must economize, shift more of its

energy costs onto the world including other living things than its competitors are able to that to economize is therefore to engage in exchanges that are sacrificial at their core and that such economization is infanticidal in its ultimate implications A Samuel Kimball is Associate Professor of English at the University of North Florida *The Gift of Sublimation* Nathan Carlin,Donald Capps,2015-06-23 There is not and never was a monolithic masculinity there are and always have been multiple masculinities Today diversity with regard to gender and sexuality is beginning to be recognized and celebrated even while many religious denominations still resist these cultural changes This book offers pastoral interpretations of these social shifts in light of psychological principles applying them to topics such as the moral disapproval of masturbation the efforts of some churches to convince homosexual men to adopt a heterosexual orientation the dynamics of male envy of female longevity the homosexual tendencies of King James of England and Scotland and biblical portraits of God s body gender and sexuality The authors make a special use of the psychoanalytic concept of sublimation that is the redirection of sexual desires that are considered unacceptable or unworthy toward interests and aspirations that are considered acceptable and worthy While the use of psychoanalytic hermeneutics here is likely to raise various red flags for potential religious readers especially for those who have been informed that Sigmund Freud was hostile toward religion this book presents a rather different Freud by focusing on religious sublimation *Happiness* Tim Lomas,2023-01-03 A concise and engaging exploration of how we understand happiness What does it mean to feel happiness As a state of mind it s elusive As a concept despite the plethora of pop psychology books on the subject it s poorly understood In this volume in the MIT Press Essential Knowledge series psychologist Tim Lomas offers a concise and engaging overview of our current understanding of happiness Lomas explains that although the field of positive psychology which focuses on happiness emerged only in the last twenty five years interest in the meaning of happiness goes back several millennia Drawing on a variety of disciplines from philosophy and sociology to economics and anthropology Lomas offers an expansive vision of what happiness means exploring a significant range of experiential territory After considering such related concepts as wellbeing and flourishing Lomas traces ideas of happiness from the ancient Buddhist notions of sukha and nirvana through Aristotle s distinction between hedonic and eudaemonic happiness to today s therapeutic and scientific approaches He discusses current academic perspectives looking at the breadth of happiness research across disciplines examines the mechanics of happiness the physiological psychological phenomenological and sociocultural processes that make up happiness explores the factors that influence happiness both individual and social and discusses the cultivation of happiness *Advances in Experimental Social Psychology* Mark P. constructive roles in the lives of children and adolescents In a society that too easily defaults to designing programs as cure alls for meeting young people s needs particular attention must be paid to understanding and mobilizing the kind of positive relational energy that prepares each successive generation to assume its place in society Although programs and institutions certainly play important roles the key lies in the personal commitment involvement and investment of adults in young people s lives In *Mobilizing Adults for Positive Youth Development Strategies for Closing the Gap between Beliefs and Behaviors* E Gil Clary and Jean E Rhodes have assembled the insights of leading scholars from multiple disciplines and contexts for engaging a broad cadre of adults as allies for youth development As the editors write the question guiding the book is How can we most effectively encourage adults both individually and collectively to begin to behave differently with respect to the young people of a community to do so consistently and to do so in a variety of ways What is being proposed then is nothing less than a social movement that engages individuals small groups neighborhoods workplaces schools faith communities and broader social institutions in attending to the well being and healthy development of young people
