Les résultats des évaluations en éducation possèdent rarement une interprétation significative en eux-mêmes. Le score prend son sens dans le cadre de référence utilisé pour l'interprétation et dans les inférences d'évaluation. Cet ouvrage est le produit de la collaboration de chercheurs et d'intervenants en éducation à la suite d'un colloque organisé en mai 2010 à Montréal au Canada lors du 78^e congrès annuel de l'Association francophone pour le savoir ACFAS. Ce colloque visait faire le point sur les avancées accomplies ainsi que les défis qui se posent dans le domaine de la mesure et de l'évaluation en éducation afin de formuler des propositions et des stratégies susceptibles de répondre aux préoccupations actuelles et de rendre les jugements d'évaluation plus valides. Quatre grands axes composaient ce colloque : la mesure, l'évaluation, la technologie et les aspects pratiques de la mesure et de l'évaluation. C'est ce quatrième axe qui fait l'objet de ce troisième volume. Au regard de la mesure, il aborde l'évaluation assistée par ordinateur et les tests adaptatifs, l'utilisation des logiciels permettant l'estimation des paramètres d'items et de personnes dans le contexte des modèles de Rasch, de même que l'application de l'analyse factorielle exploratoire, la validation conceptuelle. En ce qui a trait à l'évaluation, il s'attarde aux politiques institutionnelles d'évaluation des apprentissages, aux modèles de simulation pour soutenir l'évaluation des apprentissages, la notion d'authenticité des tâches d'évaluation et enfin l'évolution des pratiques d'évaluation des apprentissages en arts plastiques et en danse.
