Changing American Countryside Emery N. Castle, 1995 The literature on rural America to the extent that it exists has

largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little

difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected

or ignored by scholars and policymakers alike In response Emery Castle offers The Changing American Countryside a volume

that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from

several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These

authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse

issues as poverty industry the environment education family social problems ethnicity race religion gender government

public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more

than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market

place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and

international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per

cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public

policy but also suggest how the field of rural studies can greatly enrich our understanding of national life **Garden**

Thoreau's Country David R. Foster, Henry David Thoreau, 2009-06-30 In 1977 David Foster took to the woods of New England to build a cabin with his own hands Along with a few tools he brought a copy of the journals of Henry David Thoreau Foster was struck by how different the forested landscape around him was from the one Thoreau described more than a century earlier The sights and sounds that Thoreau experienced on his daily walks through nineteenth century Concord were those of rolling farmland small woodlands and farmers endlessly working the land As Foster explored the New England landscape he discovered ancient ruins of cellar holes stone walls and abandoned cartways all remnants of this earlier land now largely covered by forest How had Thoreau s open countryside shaped by ax and plough divided by fences and laneways become a forested landscape Part ecological and historical puzzle this book brings a vanished countryside to life in all its dimensions human and natural offering a rich record of human imprint upon the land Extensive excerpts from the journals show us through the vividly recorded details of daily life a Thoreau intimately acquainted with the ways in which he and his neighbors were changing and remaking the New England landscape Foster adds the perspective of a modern forest ecologist and landscape historian using the journals to trace themes of historical and social change Thoreau s journals evoke not a wilderness retreat but the emotions and natural history that come from an old and humanized landscape It is with a new understanding of the human role in shaping that landscape Foster argues that we can best prepare ourselves to appreciate and conserve it today From the journal I have collected and split up now quite a pile of driftwood rails and riders and stems and stumps of trees perhaps half or three quarters of a tree Each stick I deal with has a history and I read it as I am handling it and last of all I remember my adventures in getting it while it is burning in the winter evening That is the most interesting part of its history It has made part of a fence or a bridge perchance or has been rooted out of a clearing and bears the marks of fire on it Thus one half of the value of my wood is enjoyed before it is housed and the other half is equal to the whole value of an equal quantity of the wood which I buy
