

CourseCARD

Introduction

This course is designed to provide students with a comprehensive understanding of the principles and practices of project management. The course covers the entire project lifecycle, from initiation to closure, and includes practical applications of project management tools and techniques.

Course Objectives

By the end of this course, students will be able to:

- Define project management and its importance in various organizations.
- Identify the key components of a project, including scope, time, cost, and quality.
- Develop a project charter and a project management plan.
- Execute project tasks and manage resources effectively.
- Monitor project progress and control risks.
- Close a project and evaluate its performance.

Topics

The course covers the following topics:

- Project Management Fundamentals
- Project Initiation
- Project Planning
- Project Execution
- Project Monitoring and Control
- Project Closure

Prerequisites

There are no prerequisites for this course. However, students should have a basic understanding of business and management concepts. The course is suitable for students from various disciplines, including Business Administration, Engineering, and Information Systems.

Resources

Students are encouraged to use the following resources:

- Textbook: *Project Management: The Managerial Process* by Larson and Raymond
- Online Resources: www.pmi.org, www.projectmanagement.com

Methodology

The course uses a combination of lecture, case studies, and practical exercises. Students will be encouraged to participate in group discussions and to apply project management concepts to real-world scenarios.

Assessment

Students will be assessed through a combination of assignments, quizzes, and a final project. The final project will require students to develop a project plan and execute it, demonstrating their understanding of project management principles and practices.

None

Course Description

This course provides a comprehensive overview of project management, covering the entire project lifecycle from initiation to closure. Students will learn the principles and practices of project management, including the development of project plans, execution, monitoring, and control.

Learning Objectives

By the end of this course, students will be able to:

- Define project management and its importance.
- Identify the key components of a project.
- Develop a project charter and a project management plan.
- Execute project tasks and manage resources.
- Monitor project progress and control risks.
- Close a project and evaluate its performance.

Course Content

The course covers the following topics:

- Project Management Fundamentals
- Project Initiation
- Project Planning
- Project Execution
- Project Monitoring and Control
- Project Closure

Prerequisites

There are no prerequisites for this course. However, students should have a basic understanding of business and management concepts.

Resources

Students are encouraged to use the following resources:

- Textbook: *Project Management: The Managerial Process* by Larson and Raymond
- Online Resources: www.pmi.org, www.projectmanagement.com

Course Evaluation

Student Feedback

Students are encouraged to provide feedback on the course.

Feedback Form

Students will be provided with a feedback form to complete at the end of the course. The form will ask for their opinions on the course content, the instructor, and the overall learning experience.

Feedback Summary

A summary of the feedback will be provided to the instructor.

The feedback will be used to improve the course and to provide a better learning experience for future students.

Thank you for your feedback.
