Covering The Environment:

Covering the Environment Bob Wyss, 2008 *Covering the Environment* serves as a primer for future and current journalists reporting on environmental issues across all types of media. This practical resource explains the primary issues in writing on the environment, identifies who to go to and where to find sources, and offers examples on writing and reporting the beat. It also provides background to help environmental journalists identify their audiences and anticipate reactions to environmental news. This primer emphasizes the role of environmental journalists not as environmental advocates but as reporters attempting to accurately and fairly report the news. Contents include: An overview and history of the environment and journalism spotlighting the most significant issues in the beat; Guidance on understanding environmental and health science ranging from issues of risk to scientific research and studies to interviewing scientists; Insights into government and regulatory communities and environmental advocates on all sides of the political spectrum; Assistance in accessing public records and conducting computer assisted reporting; Guidance in writing the story for print, broadcast, and Internet audiences; An examination of the future of journalism and coverage of the environment; Observations and story excerpts from experienced journalists provide a real world component illuminating the practice of environmental journalism. Additional features in each chapter include study questions, story assignments, and resources for additional information. The book also provides a glossary of environmental science, regulator, and journalism terms, as well as a reference section and index. This resource has been developed to train advanced undergraduate and graduate journalism students to cover the science and environment community, writing print and broadcast stories to a general audience. It also serves as a guide for working journalists who cover the environment in their work.

Communication and Environment: Sustainability and Risks (Penerbit USM) Hamidah Abd. Hamid,Azman Azwan Azmawati,Jamilah Hj. Ahmad,Nik Norma Nik Hasan,2014-11-25 There is a dearth of literature on environmental communication within the non western world The few existing ones are scattered and not easily available Thus there is a dire need to document research and literature in the field The opportunity arose at the 2009 International Conference on Communication and Environment held in Penang Malaysia The international conference with the theme Transformation for a Sustainable Tomorrow organised by the School of Communication Universiti Sains Malaysia USM attracted scholars practitioners and activists from around the world to listen and deliberate on various aspects of communication and environment The post conference review resulted in the selection of 24 papers to be compiled into this edited volume The escalating degradation of environment locally and globally was the main concern that prompted

discussions on how sustainability can be advocated The development process in many countries economic activities and political decisions on issues such as deforestation for timber logging rapid urbanisation pertinently points out that environmental degradation and any communication on environmental change has to be grounded and located within the wider context of social politics and economics of the society Communication and environmental communication for that matter have also to be understood within these wider contexts Many would agree that a constant and consistent flow of information communicated through different channels to different stakeholders at the right time and destinations can help raise awareness and consciousness of environmental problems protection and preservation This vital information can enable the public and stakeholders to make informed choices and take actions whenever possible A lack of communication and information will inordinately exacerbate the situation of environmental degradation This book thus highlights how the environment is being treated in the media communicated to the society and impacted nations The chapters are grouped into the following sections Theoretical and conceptual issues Media content and the environment Politics communication and the environment Corporate social and environmental responsibility and Citizen participation human rights and the environment The editors acknowledge the excellent contributions of all the authors and are indebted to the members of the review panel the external reviewer USM Publications Committee and staff of Universiti Sains Malaysia Press for their help in ensuring the quality of this volume Most importantly we express our gratitude to USM for providing the financial support for the international conference and making it possible to publish this book The Editors January 2012 Universiti Sains Malaysia Penerbit Universiti Sains Malaysia

Ethics and Justice for the Environment Adrian C. Armstrong, 2012 Examining the issues of ethics and justice as they apply to the environment this book starts from the observation that the parallel expositions of environmental ethics and environmental justice appear to have few points of contact Environmental justice is highly politicized and concerned with human access to the environment and the unequal exposure to environmental pollution It grew out of the US civil rights movement the liberal tradition of rights and Rawls description of justice as fairness It is thus almost exclusively anthropocentric and does not address the question of justice for the environment By contrast environmental ethical studies are a wide ranging collection of approaches that are concerned with caring for the earth and the justifications for it but rarely consider the issue of justice Although the two movements do not come together at the theoretical level they do so at the grass roots activist level An essential component of this study is thus to consider both the issues of grass roots action and the application of the methods to actual case studies This book finds a common ground between these two strands and so to develop a unified statement of justice for the environment that includes the insights of both approaches particularly based on the capability ideas of justice developed by Martha Nussbaum

and socially responsible business enterprises and what lessons can be learned for the next generation of entrepreneurs The authors examine a group of over 40 entrepreneurial companies and how each balanced the profit objective with social responsibility in key aspects of their business operation from their initial company formation through growth to exit to build successful triple bottom line companies Choi and Gray particularly focus on how these firms commitment to values affected their company missions hiring and organizational policies marketing strategies financial practices exit options and giving programs and vice versa In some cases the authors find that the entrepreneurs social objectives have actually strengthened not weakened their business enterprises Based on their extensive studies of these companies he authors have distilled a set of commonalities The book presents ten of the most dominant and interesting of these commonalities with a focus on those policies and decisions that appeared to depart from conventional business practice In addition to devoting chapters to each of the core principles learned from these companies the authors also include in depth case studies of four of the ventures featured in their study *United Kingdom: Financial Sector Assessment Program-Systemic Stress, and Climate-Related Financial Risks: Implications for Balance Sheet Resilience* International Monetary,International Monetary Fund.
