Covering Oil A Reporters Guide To Energy And Development:

Covering Oil Svetlana Tsalik, Anya Schiffrin, 2005 The Revenue Watch program and the Initiative for Policy Dialogue promote transparency and civic participation in natural resource policymaking Journalists know how hard it is to report on government management of oil gas and other natural resource revenues Governments and industry are seldom forthcoming And reporters themselves usually lack the background in economics engineering geology and corporate finance helpful to understanding the energy industry and the effects of resource wealth This book attempts to redress the balance with practical information in easy to understand language Chapters include Understanding the Resource Curse A Primer on Oil Oil Companies and the International Oil Market the ABCs of Petroleum Contracts and the Environmental Social and Human Rights Impacts of Oil Development Tip sheets inform reporters about stories to pursue and questions to ask **Research**

Handbook on Energy, Law and Ethics Malik R. Dahlan, Rosa M. Lastra, Gustavo Rochette, 2022-11-22 This Research Handbook offers crucial ethical perspectives on navigating the increasingly complex and contested landscape of contemporary energy law Taking an interdisciplinary approach it brings together diverse scholarship and expertise from academia international organizations legal practice and the judiciary to address wide ranging issues linking energy and law to ethical drivers such as wealth peace and war development climate change and use and abuse of natural resources

Research Handbook on Oil and Gas Law Tina Soliman Hunter, Madeline Taylor, 2023-01-17 What does the future hold for oil and gas what can we learn from the past and what role does law have to play in this Using a unique temporal lens this Research Handbook examines core themes in oil and gas regulation from historical contemporary and forward looking perspectives **The Governance of Energy Megaprojects** Benjamin K. Sovacool, C. J. Cooper, 2013-07-01 Benjamin Sovacool and Christopher Jon Cooper have produced an astonishing and well written book based on extensive original research in twelve countries They explore the technical social political and economic dimensions of four energy megaprojects The large scale of megaprojects always appears to complicate the decision making process and often causes failures Megaprojects may even reinforce corruption and erode democracy It highlights that today's experiences can be explained by statements by Aristotle and Einstein who argue both in their own way that it is always wise to take the limits of size into account and to reduce the size of projects wherever this is possible For everybody involved in megaprojects this book must be read Hugo Priemus Delft University of Technology The Netherlands Based on extensive original research this book explores the technical social political and economic dimensions of four Asian energy megaprojects a regional natural gas pipeline network in Southeast Asia a series of hydroelectric dams on the island of Borneo an oil pipeline linking Europe with the Caspian Sea and a very large solar energy array in the Gobi desert This book investigates why energy megaprojects fail to deliver their promised benefits It offers the first comprehensive assessment of the complicated dynamics driving and constraining megaprojects initiated in the rapid scramble for energy resources and efforts to improve energy security The authors

approach the assessment of megaprojects from a socio technical angle emphasizing broad issues of political leadership regulation financing interest group opposition and environmental impact as well as conventional technological factors such as engineering design and project management The Governance of Energy Megaprojects will prove insightful for academics concerned about energy policy energy security environmental impact and technology assessment But the book should prove equally compelling to those engaged in the practical management and implementation of large scale energy projects anywhere in the world

Managing Resource Abundance and Wealth Jonathon Wayne Moses, Bjørn Letnes, 2017 Managing Resource Abundance and Wealth The Norwegian Experience describes the sundry and significant challenges both economic and political facing petroleum producing countries The volume outlines the pitfalls that policymakers encounter in the aftermath of a major resource discovery and what they can do to protect their countries from the most adverse consequences These lessons are derived from two very different sources The broader if still underdeveloped social science literature that examines the Paradox of Plenty in its disparate forms and the experience of a country that has successfully managed its natural resources over several decades As a small country on the margins of Europe Norway has stood up to powerful international interests in one of the world s most powerful industries Norway has exerted sovereign control over its natural environment and exploited its resources in a way that has delivered significant wealth to its citizens This volume explains how Norway has largely avoided the Paradox of Plenty It aims to demonstrate the variety of policy tools that are available to states rich in natural resources and how these tools can be adjusted to changing domestic and international contexts It considers a number of questions such as how countries need to administer and regulate the industry to consider the costs and benefits associated with various contract and licensing regimes and fiscal arrangements to maintain competitiveness and avoid becoming too dependent upon the sector to maximize local content and to protect the broader economy from the volatility of petroleum prices The volume shows how the industry can be managed in a democratic just and ethical manner and for the benefit of the general population

Oil, Democracy, and Development in Africa John R. Heilbrunn, 2014-04-21 This book focuses on the history key industry and policy actors and political economic outcomes in oil producing African states filling a gap in the literature on resource abundant countries by providing an optimistic assessment of circumstances in contemporary Africa

Institutional Design and Capacity to Enhance Effective Governance of Oil and Gas Wealth: The Case of Kurdistan Region Khazal Abdullah Auzer, 2017-05-15 This book presents a critical reappraisal of the resource curse thesis and extends the analysis to consider political and social dimensions and thus the importance of structure in the petroleum sector s governance model It examines major challenges surrounding the governance of petroleum resources and the implications for the economic growth and development of hydrocarbon abundant countries as a result of ineffective economic political and social mechanisms The book subsequently investigates a range of causal factors that may promote or hinder the effective management of oil and gas resources in the Kurdistan Region which also has

implications for the security of the wider region and for global energy security The book also seeks to arrive at lessons learned and policy guidelines to help inform other new petroleum exporting countries and regions about how to best manage their newfound wealth *Oil Wealth and Development in Uganda and Beyond* Arnim Langer, Ukoha Ukiwo, Pamela Mbabazi, 2020-01-07 Multidisciplinary perspectives to governance of oil in African countries Large quantities of oil were discovered in the Albertine Rift Valley in Western Uganda in 2006 The sound management of these oil resources and revenues is undoubtedly one of the key public policy challenges for Uganda as it is for other African countries with large oil and or gas endowments With oil expected to start flowing in 2021 the current book analyses how this East African country is preparing for the challenge of effectively efficiently and transparently managing its oil sector and resources Adopting a multidisciplinary comprehensive and comparative approach the book identifies a broad scope of issues that need to be addressed in order for Uganda to realise the full potential of its oil wealth for national economic transformation

Predominantly grounded in local scholarship and including chapters drawing on the experiences of Nigeria Ghana and Kenya the book blazes a trail on governance of African oil in an era of emerging producers *Oil Wealth and Development in Uganda and Beyond* will be of great interest to social scientists and economic and social policy makers in oil producing countries It is suitable for course adoption across such disciplines as International Global Affairs Political Economy Geography Environmental Studies Economics Energy Studies Development Politics Peace Security and African Studies Contributors Badru Bukenya Makerere University Moses Isabirye Busitema University Wilson Bahati Kazi Uganda Revenue Authority Corti Paul Lakuma Economic Policy Research Centre Joseph Mawejje Economic Policy Research Centre Pamela Mbabazi Uganda National Planning Authority Martin Muhangi independent researcher Roberts Muriisa Mbarara University of Science and Technology Chris Byaruhanga Musiime independent researcher Germano Mwabu University of Nairobi Jackson A Mwakali Makerere University Tom Owang Mbarara University of Science and Technology Joseph Oloka Onyango Makerere University Peter Quartey University of Ghana Peter Wandera Transparency International Uganda Kathleen Brophy Transparency International Uganda Jaqueline Nakaiza independent researcher Babra Beyeza independent researcher Jackson Byaruhanga Bank of Uganda Emmanuel Abbey University of Ghana **Energy Security, Equality and Justice** Benjamin K.

Sovacool, Roman V. Sidortsov, Benjamin R. Jones, 2013-12-04 This book applies concepts from ethics justice and political philosophy to five sets of contemporary energy problems cutting across time economics politics geography and technology In doing so the authors derive two key energy justice principles from modern theories of distributive justice procedural justice and cosmopolitan justice The prohibitive principle states that energy systems must be designed and constructed in such a way that they do not unduly interfere with the ability of people to acquire those basic goods to which they are justly entitled The affirmative principle states that if any of the basic goods to which people are justly entitled can only be secured by means of energy services then in that case there is also a derivative entitlement to the energy services In laying out and

employing these principles the book details a long list of current energy injustices ranging from human rights abuses and energy related civil conflict to energy poverty and pervasive and growing negative externalities The book illustrates the significance of energy justice by combining the most up to date data on global energy security and climate change including case studies and examples from the electricity supply transport and heating and cooking sectors with appraisals based on centuries of thought about the meaning of justice in social decisions *Investment Contracts and Sustainable Development* Lorenzo Cotula,2010 *Energy Law, Climate Change and the Environment* Martha M. based knowledge and the application of the law to technical issues **Managing Regional Energy Vulnerabilities in East Asia** Daojiong Zha,2013-08-29 This book examines East Asia's interstate collaborative energy projects to address energy vulnerability. It focuses on projects that have demonstrated effectiveness in addressing vulnerabilities faced by the ten states of the Association of Southeast Asian Nations and China, Japan and South Korea in Northeast Asia. Including case studies on uncertainties in external sources of oil and gas supply, maritime piracy, continuation of energy poverty and geographical barriers to cross-border electricity interconnection, expert contributors highlight how collaborative energy projects have been more successful than the traditional state rivalry in energy-related issues. The book develops the framework of energy vulnerability, avoiding usual securitization approaches, instead examining non-traditional security conceptualizations in studying energy policies to examine how issue-specific cooperation efforts between states arise and develop. Using East Asia as a starting point, contributors introduce a framework that advances the study of international energy cooperation. *Managing Regional Energy Vulnerabilities in East Asia* will be of interest to students and scholars of Asian studies, sociology, development studies and international political economy, particularly the political economy of East Asia, energy and development studies, regional and global governance of energy and the environmental economics.

Dignity and Defiance James Shultz, Melissa Draper,2009-01-07 *Dignity and Defiance* is a powerful eyewitness account of Bolivia's decade-long rebellion against globalization imposed from abroad. Based on extensive interviews, this story comes alive with first-person accounts of a massive Enron/Shell oil spill from an elderly woman whose livelihood it threatens, of the young people who stood down a former dictator to take back control of their water, and of Bolivia's dramatic and successful challenge to the policies of the World Bank and the International Monetary Fund. Featuring a substantial introduction, a conclusion and introductions to each of the chapters, this well-crafted mix of storytelling and analysis is a rich portrait of people calling for global integration to be different than it has been: more fair and more just.
