The Fairy Bower, or, the history of a month. A tale for young people. By Mrs. Mozley FAIRY BOWER., Harriet Elizabeth Mozley, 1848 *Nominal Syntax at the Interfaces* Giuliana Giusti, 2015-10-28 This volume offers a new perspective on the syntax of nominal expressions in various European languages arguing that articles do not directly and biunivocally realise semantic definiteness The first two chapters provide an accessible introduction to recent developments in generative syntax namely the cartographic and minimalist approaches by focusing on the imperfect parallels between clauses and nominal expressions The third chapter shows that feature sharing is not the result of a unique syntactic process but rather the consequence of Merge which creates syntactic structure instantiating two types of relation Selection and Modification It argues for three different ways of transferring features Agreement allows for an argument an independent phase selected by a head to re enter the computation as part of the predicate of the new phase It targets Person features and is not involved in the feature sharing triggered by modification Concord copies the features of N notably gender number and case where this is present It is the result of Modification and can coexist with Agreement Finally Projection is triggered by multiple internal mergers of the head bundled with all its interpretable and uninterpretable features which may be realized in different segments The fourth chapter focuses on the nature of determiners such as articles demonstratives quantifiers possessive adjectives and pronouns personal pronouns and proper names and shows that only articles have the properties to be attributed to functional heads because they are a segment of a scattered nominal head The rest of the volume is devoted to the analysis of syntactic phenomena such as double definiteness expletive articles and weak and strong adjectival inflection by means of the proposal that scattered nominal or adjectival heads concord with their modifiers This

approach reinterprets head movement in a fashion that makes it compatible with minimalist requirements provides an explanation for the apparent optionality of head movement eliminates the typology of head movements by adjunction or substitution and gives an original answer to the doubts raised about the legitimacy of the very notion of functional category
