Brain Tricks Coping With Your Defective Brain:

Brain Tricks David L. Weiner, 1995-03 gets to the bottom of why the human brain seems to propel us toward destructive behavior Dallas Morning News How often have you heard that what distinguishes humans from other forms of advanced life is our superior brain We can think rationally and make intelligent decisions we are masters of ourselves and our world But the fact is that the way we think and react can get us into trouble We don't use our brain it uses us Understanding how our instincts gut reactions emotions and conditioning rule our lives is one powerful part of author David L. Weiner's *Brain Tricks* *Brain Tricks* probes what Weiner calls the dark side of the brain raw animal instincts rooted in our primitive past when survival mating and taming the environment required instant uncritical and wholly self-centered decision making Though modified by early childhood conditioning our primitive thought patterns continue to this day Our brain ignores the rituals and rules of civilized society as we overreact to sudden situations indulge in strong emotions and prejudice and try to manipulate others When we succumb to our dark side brain tricks trouble is not far off We alienate friends and lovers quarrel with our bosses become obsessed with possessions commit murder and start wars In clear easy to understand language Weiner dramatizes the genetic and conditioned programming that can lead us into chaos Using well developed vignettes featuring friends lovers business and professional associates he provides an inviting vehicle for discussing our hard to resist tendencies to exert power over others indulge in greed succumb to jealousy and rage and invent scapegoats to mask our own faults

Feel Good Every Day Mikael Von Matérn,2015-03-19 After a few hectic but wonderful years I woke up in a hospital close to my hometown in Sweden What had happened Only yesterday I felt like a champion Maybe it was my eagerness to explore the world around me that had put me here Or maybe it was my fear of missing out on some potentially rewarding experience Maybe I had been just a little bit too eager trying to make my dreams come true or could my brush with death simply be a case of bad luck There was a severe inflammation in my brain which at times made it hard for me even to recognize my loved ones To me questions like 2 2 seemed more fitting for a rocket scientist The doctors were deeply concerned and told me that my prognosis was very uncertain Things certainly looked bleak but surviving this whole ordeal was still in the cards At the time it made more sense to me to simply see my situation as a case of bad luck Nonetheless six months later and completely recovered I realized that this was the result of something completely different My love for life and my desire to experience as much as possible had blocked my inner signals It was like an inner voice telling me to Relax Don t try to do everything at once Stop and smell the roses Unfortunately I ignored this worried voice that was trying to look out for me As I took my first stumbling steps leaving the hospital I can still clearly remember how alert my senses truly were Children s laughter made me feel all warm inside The simple beauty of the sky shifting color made me stop all of a sudden in awe Smelling the first spring flowers gave me goose bumps The taste of fresh air being sucked into my lungs made me feel deeply relaxed and the sensation of once again experiencing life made me somewhat euphoric I was completely present in the moment and my senses were shaper than ever before This was the beginning of a new journey for me I started to examine exactly what is needed to create the best possible conditions for feeling good and how we are to create the best possible lives for ourselves Eight years later I have now compiled my research and theories in this book My research has led me to conclude that it is possible for each and every one of us to feel good every day throughout our whole lives
