differential impact this study situates developments within a wider historical social and political context to establish how these processes of globalization are mediated at the regional and local level The main object of study concerns the drastic socioeconomic transformation that has taken place in the state of Coahuila situated in the northeast of Mexico bordering the United States over the past three decades In particular since the start of NAFTA in 1994 Coahuila has become one of Mexico's most successful export oriented manufacturing states most importantly as a result of the large number of foreign direct investments it received However the effects of these developments have been unevenly distributed among its sub regions while questions must also be raised about its ability to contribute to sustained long term growth with equity The key issue appears to be not whether but how regions and localities become linked to the world economy page 4 of cover [FAA Emergency Operations Plan](#) United States.
