Bowers Row Jim Bullock, 1976 BR Swindon Type 1 0-6-0 Diesel-Hydraulic Locomotives—Class 14 Anthony P. Sayer, 2022-08-09 A pictorial survey of the Class 14 locomotive's twenty year history in British industry In 1957 the Western Region of British Railways identified a need for 400 Type 1 diesel locomotives for short haul freight duties but it was 1964 before the first was introduced General purpose Type 1s were being delivered elsewhere but WR management regarded these as too expensive for their requirements After completion of design work on the Western locomotives Swindon turned to creating a cheap no frills Type 1 At 65% of the cost of the Bo Bo alternative the Swindon 0 6 0 represented a better fit for the trip freight niche Since 1957 the privatised road haulage industry had decimated BR's wagon load sector whilst the 1962 Transport Act released BR from its financially debilitating public service obligations the damage had been done and the 1963 Beeching Plan focused on closing unprofitable routes and associated services By 1963 the original requirement for 400 Type 1s had been massively reduced Fifty six locomotives were constructed in 1964 65 Continuing traffic losses resulted in the whole class becoming redundant by 1969 Fortunately a demand for high powered diesels on the larger industrial railway systems saw the bulk of the locomotives finding useful employment for a further twenty years This companion book to *Their Life on British Railways* provides an extensive appraisal of *Their Life in Industry* for the forty eight locomotives which made the successful transition after withdrawal from BR in 1968 69 Inside is the most extensive published work on Class 14s in industry with illustrations tabulated data complete dates and records plus information and maps about the coal and steel sites at which they worked Comprehensive Trackside magazine The amount of detail and level of research is impressive and this series of books is invaluable for anyone interested in modern traction history Railways Illustrated **Men and Menswear** Laura Ugolini, 2017-03-02 Despite increasing academic interest in both the study of masculinity and the history of consumption there are still few published studies that bring together both concerns By investigating the changing nature of the retailing of menswear this book illuminates wider aspects of masculine identity as well as patterns of male consumption between the years 1880 and 1939 While previous historical studies of masculinity have focused overwhelmingly on the moral spiritual and physical characteristics associated with notions of manliness this book considers the relationship between men and activities which were widely considered to be at least potentially unmanly selling as well as buying clothes thus shedding new light on men's lives and identities in this period *The History of the Yorkshire Miners 1881-1918* Carolyn Baylies, 2023-02-28 First published in 1993 *The History of the Yorkshire Miners 1881 1918* is concerned with the workers in the Yorkshire coal industry their union and the broader mining communities in which they lived from the formation of the Yorkshire Miners Association in 1881 through to the end of the First World War The period covered is of considerable importance for the consolidation of the Yorkshire Miners Union and indeed for the building of a national miners federation and an international miners organisation in both of which the role of Yorkshire's leadership was central The decades

straddling the turn of the century were characterised by volatility in the mining industry which was reflected in a number of strikes Carolyn Baylies traces these general processes and focuses in detail upon a number of episodes during which union struggles and community involvement coalesced She explores the dynamic between district and local levels of the union and the tensions that accompanied a progressive rationalization of bargaining machinery This book will be of interest to students of history and sociology

Caught in the Machinery Jamie L. Bronstein, 2008 *Caught In the Machinery* examines the social legal cultural and political history of workplace accidents and injured workers in 19th century Britain and in the broader Anglo American context

Women at Work, 1860-1939 Valerie G. Hall, 2013 A major contribution to women s history labour history and economic and social history This book examines three different groups of women in coal mining communities in inshore fishing communities and in agricultural labour It demonstrates how the work these groups undertook was fundamental in shaping their experiences as women in different ways and shows that women s experiences varied within class as well as between classes The book illustrates how mining women despite being restricted to

domestic roles created through meticulous housekeeping a power base in their homes and rendered their husbands dependent on them while a minority took so active a role in politics that they were said to be the backbone of the Labour Party how fisher women engaging in a household economy reminiscent of pre modern times exercised great influence on financial decision making through their roles in baiting lines and selling fish and how some single female agricultural labourers exercised considerable autonomy whereas those who were tied in a family economy had little independence Overall the book makes a very significant contribution to women s history to labour history and to economic and social history This is a tremendously useful and relevant book for historians of women as well as social and labor historians Professor Joan Scott Institute of Advanced Studies Princeton University VALERIE HALL is Professor Emerita of History at William Peace University North Carolina

Working Class Cultures in Britain, 1890-1960 Prof Joanna Bourke, Joanna Bourke, 2008-01-28 Integrating a variety of historical approaches and methods Joanna Bourke looks at the construction of class within the intimate contexts of the body the home the marketplace the locality and the nation to assess how the subjective identity of the working class in Britain has been maintained through seventy years of radical social cultural and economic change She argues that class identity is essentially a social and cultural rather than an institutional or political phenomenon and therefore cannot be understood without constant reference to gender and ethnicity Each self contained chapter consists of an essay of historical analysis introducing students to the ways historians use evidence to understand change as well as useful chronologies statistics and tables suggested topics for discussion and selective further reading
