Power and Horizontality in South-South Development Cooperation. The Case of Brazil and Mozambique Jurek Seifert, 2020-02-24 The growing importance of new actors in the global political landscape is envisaged as a phenomenon that has led to shifts in international power relations This is reflected in development cooperation Countries like China Brazil India and South Africa have enhanced their cooperation programs and present their development cooperation as South South Development cooperation SSDC which takes place between countries of the Global South Both practitioners and scholars ascribe a notion of solidarity and horizontality to South South cooperation that allegedly distinguishes it from the relationship patterns commonly associated with North South relations However power constellations between the emerging powers and most of their cooperation partners are often asymmetrical This book asks whether the claim that South South cooperation is conducted in a horizontal manner holds in practice in spite of these asymmetries It revises the concept of South South cooperation and identifies the central characteristics that are claimed to distinguish the Southern modality from Northern cooperation It then investigates the relationship between Brazil and Mozambique during the period 2003-2014 to shed some light on the question whether South South cooperation is different from traditional development cooperation regarding the relations between cooperation partners Jurek Seifert is a development cooperation expert He holds a PhD from the University of Duisburg-Essen and has worked on South South cooperation development effectiveness and private sector engagement He has conducted research at the BRICS Policy Center in Rio de Janeiro Brazil and works in international development cooperation

Brazil's International Ethanol Strategy Thomas Fröhlich, 2022-02-08 Under the governments of Lula da Silva and Dilma Rousseff Brazil aimed at creating a global market for ethanol as a green transport fuel and ethanol diplomacy became a signature component of Brazil's international insertion at the time This study examines Brazil's international ethanol strategy and creates a comprehensive overview of the theoretical and practical approaches that Brazil undertook to promote ethanol as a tool to achieve energy

Buser,2021-01-04 The book assesses emerging powers influence on international economic law and analyses whether their rhetoric of reforming this unjust order translates into concrete reforms The questions at the heart of the book surround the extent to which Brazil Russia India China and South Africa individually and as a bloc BRICS provide alternative regulatory ideas to those of Western States and whether they are able to convert their increased power into influence on global regulation To do so the book investigates two broader case studies namely the reform of international investment agreements and WTO reform negotiations since the start of the Doha Development Round As a general outcome it finds that emerging powers do not radically challenge established law Third World rhetoric mostly does not translate into practice and rather serves to veil economic interests Still emerging powers provide for some alternative regulatory ideas already leading to a diversification of international economic law As a general rule they tend to support norms that allow host States much policy space which could be used to protect and fulfil socio economic human rights especially but not only in the Global South
