Agency Health And Social Survival:

Making Realism Work Bob Carter, Caroline New, 2005-10-09 In this innovative book theorists and researchers from various social science disciplines explore the potential of realist social theory for empirical research The examples are drawn from a wide range of fields health and medicine crime housing sociolinguistics development theory and deal with issues such as causality probability and reflexivity in social science Varied and lively contributions relate central methodological issues to detailed accounts of research projects which adopt a realist framework Making Realism Work provides an accessible discussion of a significant current in contemporary social science and will be of interest to social theorists and social researchers alike

An Intimate Loneliness Riches, Gordon, Dawson, Pam, 2000-01-01 What impact does a child's death have on family relationships How might differences in the way mothers and fathers deal with bereavement contribute to increased marital tension Why are bereaved siblings so deeply affected by the way their parents grieve An Intimate Loneliness explores how family members attempt to come to terms with the death of an offspring or brother or sister Drawing on relevant research and the authors own experience of working with bereaved parents and siblings this book examines the importance of social relationships in helping parents and siblings adjust to their bereavement The chances of making sense of this most distressing loss are influenced by the resilience of the family's surviving relationships by the availability of wider support networks and by the cultural resources that inform each's perception of death This book considers the impact of bereavement on self and family identity In particular it examines the role of shared remembering in transforming survivors relationships with the deceased and in helping rebuild their own identity with a significantly changed family structure Problems considered include the failure of intimate relationships cultural and gender expectations the invisibility of fathers and siblings grief sudden and difficult deaths lack of information and the sense of isolation felt by some family members This book will be of value to students on courses in counselling health care psychology social policy pastoral care and education It will appeal to sociology students with an interest in death dying and mortality It is also aimed at professionally qualified counselling health and social service workers at informed voluntary group members the clergy teachers and others involved with pastoral care

Transcendence Margaret S. Archer, Andrew Collier, Douglas V. Porpora, 2013-04-15 Atheism as a belief does not have to present intellectual credentials within academia Yet to hold beliefs means giving reasons for doing so ones which may be found wanting Instead atheism is the automatic default setting within the academic world Conversely religious belief confronts a double standard Religious believers are not permitted to make truth claims but are instead forced to present their beliefs as part of one language game amongst many Religious truth claims are expected to satisfy empiricist criteria of evidence but when they fail as they must religious belief becomes subject to the hermeneutics of suspicion This book explores religious experience as a justifiable reason for religious belief It uniquely demonstrates that the three pillars of

critical realism ontological intransitivity epistemic relativity and judgemental rationality can be applied to religion as to any other beliefs or theories The three authors are critical realists by philosophical position They seek to establish a level playing field between religion and secular ideas which has not existed in the academic world for some generations in order for reasoned debate to be conducted

Revolution in Psychology Ian Parker, 2007-06-20 A radical methodological approach to psychology that is open to social change in an anti capitalist anti racist and feminist politics Antonio Negri Psychology is meant to help people cope with the afflictions of modern society But how useful is it Ian Parker argues that current psychological practice has become part of the problem rather than the solution Ideal for undergraduates this book deconstructs the discipline to reveal the neoliberal sensitivities that underlie its theory and practice Psychology focuses on the happiness of the individual Yet it neglects the fact that the happiness of the individual depends on their social and political surroundings Ian Parker argues that a new approach to psychology is needed He offers an alternative vision outlining how the discipline can be linked to political practice and how it can help people as part of a wider progressive agenda This groundbreaking book is at the cutting edge of current thinking on the discipline and should be required reading on all psychology courses

Dictionary of Critical Realism Mervyn Hartwig, 2015-01-30 Dictionary of Critical Realism fulfils a vital gap in the literature Critical Realism is often criticised for being too opaque and deploying too much jargon thereby making the concepts inaccessible for a wider audience However as Hartwig puts it Just as the tools of the various skilled trades need to be precision engineered for specific interrelated functions so meta theory requires concepts honed for specific interrelated tasks it is impossible to think creatively at that level without them This Dictionary seeks to redress this problem to throw open the important contribution of Critical Realism to a wider audience for the first time by thoroughly explaining all the key concepts and key developments It includes 500 entries on these themes and has contributions from major players in field However this text does not stop there it goes further than simply elucidating the concepts and includes a number of essays which use the notions in important areas thereby demonstrating the appropriate use of the concepts in action to encourage their wider use This book will become a requisite reference tool for Critical Realist scholars and Philosophers and Social scientists alike will enjoy this vital introduction and explanatory text of the indispensable ideas contained within the dynamic and vibrant school of Critical Realism

Lacan and the Political Yannis Stavrakakis, 2002-09-11 The work of Jacques Lacan is second only to Freud in its impact on psychoanalysis Yannis Stavrakakis clearly examines Lacan s challenging views on time history language alterity desire and sexuality from a political standpoint It is the first book to provide an overview of the social and political implications of Lacan s work as a whole for students coming to Lacan for the first time The first part of Lacan and the

Political offers a straightforward and systematic assessment of the importance of Lacan's categories and theoretical constructions for concrete political analysis. The second half of the book applies Lacanian theory to specific examples of widely discussed political issues such as Green ideology, the question of democracy, and the hegemony of advertising in contemporary culture.

Emotional Life and the Politics of Welfare P. Hoggett, 2000-08-22. Social policy and political theory are based upon rationalist models of the human subject. Drawing particularly upon contemporary Kleinian and feminist political theory, the author explores the powerful role that emotions such as love, hate, and fear play in the development of the human subject. From this base, the book then examines a range of contemporary issues such as employment dependency, care and generosity, conflict and oppression, which are relevant to struggles around the welfare state.

Realism and Social Science Andrew Sayer, 2000-02-11. Realism and Social Science offers the reader an authoritative and compelling guide to critical realism and its implications for social theory and for the practice of social science. It offers an alternative both to approaches which are overly confident about the possibility of a successful social science and those which are defeatist about any possibility of progress in understanding the social world. Written by one of the leading social theorists in the field, it demonstrates the virtues of critical realism for theory and empirical research in social science and provides a critical engagement with leading non-realist approaches.

Paradoxes in Social Work Practice Merlinda Weinberg, 2016-03-17. In the helping professions, codes of ethics and decision-making models have been the primary vehicles for determining what constitutes ethical practice. These strategies are insufficient since they assume that shared meanings exist and that the contradictory universal principles of codes can be reconciled. Also, these tools do not emphasize the significance of context for ethical practice. This book takes a new critical theoretical approach which involves exploring how social workers construct what is ethical in their work, especially when they are positioned at the intersection of multiple paradoxes, including that of two opposing responsibilities in society: namely, to care for others but also to prevent others from harm. The book is built on narratives from actual front-line workers and therefore is more applicable and grounded for practitioners and students, offering many suggestions for sound practice. It illustrates that an understanding of ethics differs from worker to worker and is heavily influenced by context, workers' values, and what they take up as the primary discourses that frame their perceptions of the profession. While recognizing the oppressive potential of social work, the book is rooted in a perspective that ethical practice can contribute to a more socially just society.

A Feminist Glossary of Human Geography Linda McDowell, Joanne P. Sharp, 2014-05-01. A Feminist Glossary of Human Geography is the first guide to the main theories, concepts, and terms commonly used in geographical debates about gender relations. Written by key contributors to feminist theory, it contains over 400 lively and accessible definitions of the terms found in feminist debates, which students of

geography need to know Four levels of entry are used from 50 to 1500 words taking account of the varying degrees of complexity of the terms covered From AIDS to witch from abortion to whiteness this Glossary is cross referenced throughout and includes a comprehensive bibliography It is an invaluable reference for anyone studying geography and gender enabling them to approach the terminology of feminist theory and ideas with confidence *The SAGE Encyclopedia of Social Science Research Methods* Michael Lewis-Beck, Alan E Bryman, Tim Futing Liao, 2004 This defining work will be valuable to readers and researchers in social sciences and humanities at all academic levels As a teaching resource it will be useful to instructors and students alike and will become a standard reference source Essential for general and academic collections
