Alexander Artikis,Greogory M. P. O'Hare,Kostas Stathis,George Vouros,2008-10-07 This book constitutes the thoroughly refereed post conference proceedings of the 7th International Workshop on Engineering Societies in the Agents World ESAW 2007 held in Athens Greece in October 2007 The 19 revised full papers were carefully reviewed and selected for inclusion in this book The papers are organized in topical sections on electronic institutions models of complex distributed systems with agents and societies interaction in agent societies engineering social intelligence in multi agent systems trust and reputation in agent societies analysis design and development of agent societies **Defeasible Deontic Logic** Donald Nute,2012-12-06 Relevant to philosophy law management and artificial intelligence these papers explore the applicability of nonmonotonic or defeasible logic to normative reasoning The resulting systems purport to solve well known deontic paradoxes and to provide a better treatment than classical deontic logic does of prima facie obligation conditional obligation and priorities of normative principles **The Handbook of Rationality**

Markus Knauff,Wolfgang Spohn,2021-12-14 The first reference on rationality that integrates accounts from psychology and philosophy covering descriptive and normative theories from both disciplines Both analytic philosophy and cognitive psychology have made dramatic advances in understanding rationality but there has been little interaction between the disciplines This volume offers the first integrated overview of the state of the art in the psychology and philosophy of rationality Written by leading experts from both disciplines The Handbook of Rationality covers the main normative and descriptive theories of rationality how people ought to think how they actually think and why we often deviate from what we can call rational It also offers insights from other fields such as artificial intelligence economics the social sciences and cognitive neuroscience The Handbook proposes a novel classification system for researchers in human rationality and it creates new connections between rationality research in philosophy psychology and other disciplines Following the basic distinction between theoretical and practical rationality the book first considers the theoretical side including normative and descriptive theories of logical probabilistic causal and

defeasible reasoning It then turns to the practical side discussing topics such as decision making bounded rationality game theory deontic and legal reasoning and the relation between rationality and morality Finally it covers topics that arise in both theoretical and practical rationality including visual and spatial thinking scientific rationality how children learn to reason rationally and the connection between intelligence and rationality

Agent Computing and Multi-Agent Systems Aditya Ghose, Guido Governatori, Ramakoti Sadananda, 2009-04-22 This book constitutes the thoroughly refereed post workshop proceedings of the 10th Pacific Rim International Workshop on Multi Agents PRIMA 2007 held in Bangkok Thailand in November 2007 The 22 revised full papers and 16 revised short papers presented together with 11 application papers were carefully reviewed and selected from 102 submissions Ranging from theoretical and methodological issues to various applications in different fields the papers address many current subjects in multi agent research and development

Handbook of Modal Logic Patrick Blackburn, Johan F.A.K. van Benthem, Frank Wolter, 2006-11-03 The Handbook of Modal Logic contains 20 articles which collectively introduce contemporary modal logic survey current research and indicate the way in which the field is developing The articles survey the field from a wide variety of perspectives the underlying theory is explored in depth modern computational approaches are treated and six major applications areas of modal logic in Mathematics Computer Science Artificial Intelligence Linguistics Game Theory and Philosophy are surveyed The book contains both well written expository articles suitable for beginners approaching the subject for the first time and advanced articles which will help those already familiar with the field to deepen their expertise Please visit http://people.uh.edu/~ca/woods/RedSeriesPromo_WP_PubSLPR.html Compact modal logic reference Computational approaches fully discussed Contemporary applications of modal logic covered in depth

Johan van Benthem on Logic and Information Dynamics Alexandru Baltag, Sonja Smets, 2014-08-27 This book illustrates the program of Logical Informational Dynamics Rational agents exploit the information available in the world in delicate ways adopt a wide range of epistemic attitudes and in that process constantly change the world itself Logical Informational Dynamics is about logical systems putting such activities at center stage focusing on the events by which we acquire information and change attitudes Its contributions show many current logics of information and change at work often in multi agent settings where social behavior is essential and often stressing Johan van Benthem's pioneering work in establishing this program However this is not a Festschrift but a rich tapestry for a field with a wealth of strands of its own The reader will see the state of the art in such topics as information update belief change preference learning over time and strategic interaction in games Moreover no tight boundary has been enforced and some chapters add more general mathematical or philosophical foundations or links to current trends in computer science The theme of this book lies at the interface of many disciplines Logic is the main methodology but the various chapters cross easily between mathematics computer science philosophy linguistics cognitive and social sciences while also ranging from pure theory to empirical work Accordingly the authors of this book represent a wide variety of original thinkers from

different research communities And their interconnected themes challenge at the same time how we think of logic philosophy and computation Thus very much in line with van Benthem s work over many decades the volume shows how all these disciplines form a natural unity in the perspective of dynamic logicians broadly conceived exploring their new themes today And at the same time in doing so it offers a broader conception of logic with a certain grandeur moving its horizons beyond the traditional study of consequence relations

The Cognitive Foundations of Group Attitudes and Social Interaction Andreas Herzig,Emiliano Lorini,2015-10-12 This book offers a widely interdisciplinary approach to investigating important questions surrounding the cognitive foundations of group attitudes and social interaction The volume tackles issues such as the relationship between individual and group attitudes the cognitive bases of group identity and group identification and the link between emotions and individual attitudes This volume delves into the links between individual attitudes such as beliefs goals and intentions and how they are reflected in shared attitudes where common belief collective acceptance joint intentions and group preferences come into play It pursues answers to the connections between trust and beliefs goals and intentions and attempts to investigate questions such as does trust have an affective component and how it may relate to hope and fear The volume also scrutinizes game theory and questions whether it can satisfactorily explain and model social interaction and if there may be any concepts which are not addressed by the current theory Contributors are derived from disciplines including philosophy economics psychology logic and computer science Interdisciplinary in scope and comprehensive detail this volume integrates a variety of approaches philosophical psychological and artificial intelligence to strategic normative and emotional aspects of social interaction

PRIMA 2018: Principles and Practice of Multi-Agent Systems Tim Miller,Nir Oren,Yuko Sakurai,Itsuki Noda,Bastin Tony Roy Savarimuthu,Tran Cao Son,2018-10-23 This book constitutes the refereed proceedings of the 21st International Conference on Principles and Practice of Multi Agent Systems PRIMA 2018 held in Tokyo Japan in October November 2018 The 27 full papers presented and 31 short papers were carefully reviewed and selected from 103 submissions PRIMA presents subjects in many application domains particularly in e commerce and also in planning logistics manufacturing robotics decision support transportation entertainment emergency relief and disaster management and data mining and analytics

Oxford Studies in Metaethics Russ Shafer-Landau,2006-05-11 The contents of the inaugural volume of Oxford Studies in Metaethics nicely mirror the variety of issues that make this area of philosophy so interesting The volume opens with Peter Railton s exploration of some central features of normative guidance the mental states that underwrite it and its relationship to our reasons for feeling and acting In the next offering Terence Cuneo takes up the case against expressivism arguing that its central account of the nature of moral judgments is badly mistaken Terence Horgan and Mark Timmons two of the most prominent contemporary expressivists then offer their take on how expressivism manages to avoid a different objection that of collapsing into an objectionable form of relativism Daniel Jacobson and Justin D Arms next offer an article that continues

their research program devoted to exploring the extent to which values might depend upon or be constrained by human psychology Ralph Wedgwood engages in some classical metaethical conceptual analysis seeking to explicate the meaning of ought Mark van Roojen then contributes a new take on the Moral Twin Earth Argument a prominent anti realist puzzle advanced in the early 1990s by Horgan and Timmons Allan Gibbard next presents his latest thoughts on the nature of moral feelings and moral concepts crucial elements in the overall project of defending the expressivism he is so well known for James Dreier then takes up the details of Gibbard s recent efforts to provide a solution to what many view as the most serious difficulty for expressivism namely the Frege Geach problem Dreier identifies difficulties in Gibbard s expressivist account and offers a suggestion for their solution Sergio Tenenbaum explores the concept of a direction of fit relied on so heavily nowadays in accounts of moral motivation Nadeem Hussain and Nishiten Shah then consider the merits of Christine Korsgaard s influential critique of moral realism T M Scanlon s widely discussed buck passing account of value attracts the critical eye of Pekka V auml yrynen who attempts to reveal the reasons that we might resist it Derek Parfit s contribution concludes this volume with an article on normativity that presents his most recent thinking on this fundamental notion

Formal Approaches to Agent-Based Systems Michael G. Hinchey, James L. Rash, Walter F. Truszkowski, Christopher Rouff, Diana Gordon-Spears, 2003-10-24 The idea of a FAABS workshop was first conceived in 1998 at the NASA Goddard Space Flight Center while the Agent Technology Development Group in the Advanced Architectures and Automation Branch Code 588 was developing a prototype agent community to automate satellite ground operations While developing this system several race conditions arose within and between agents Due to the complexity of the agents and the communications between them it was decided that a formal approach was needed to specify the agents and the communications between them so that the system could be checked for additional errors A formal model of the inter agent communications was developed with the expectation that this would enable us to find more errors Success in this convinced us of the importance of using formal methods to model agent based systems To share our own experiences and to learn how others were approaching these issues we decided to hold a workshop on formal methods and agent based systems The response was overwhelming The result was the first FAABS workshop which was held at the NASA Goddard Space Flight Center Posters paper presentations panels and an invited talk by J Moore stimulated much discussion and subsequent collaboration

Logic, Rationality, and Interaction Xiangdong He, John Horty, Eric Pacuit, 2009-09-23 Edited in collaboration with FoLLI the Association of Logic Language and Information this book constitutes the refereed proceedings of the Second International Workshop on Logic Rationality and Interaction LORI 2009 held in Chongqing China in October 2009 The 24 revised full papers presented together with 8 posters were carefully reviewed and selected from a flood of submissions The workshops topics include but are not limited to semantic models for knowledge for belief and for uncertainty dynamic logics of knowledge information flow and action logical analysis of the structure of games belief revision belief merging logics for

preferences and utilities logics of intentions plans and goals logics of probability and uncertainty argument systems and their role in interaction as well as norms normative interaction and normative multiagent systems
