Aggression Replacement Training:

Aggression Replacement Training Barry Glick, John C. Gibbs, 2010-10 Rev ed of Aggression replacement training a comprehensive intervention for aggressive youth Arnold P Goldstein Barry Glick John C Gibbs Rev ed c1998 *New Perspectives on Aggression Replacement Training* Arnold P. Goldstein, Rune Nensén, Bengt Daleflod, Mikael Kalt, 2005-01-28 Aggression Replacement Training ART is a cognitive behavioural intervention targeted to aggressive adolescents and children which is being increasingly adopted worldwide The outcome of the first major conference on the growing status of ART and its future directions this book's coverage includes the cognitive behavioural context of ART the component procedures various training approaches and program applications research evaluations and extensions and elaborations

Aggression Replacement Training Arnold P. Goldstein, Barry Glick, 1987 Aggression Replacement Training ART offers a comprehensive intervention program designed to teach adolescents to understand and replace aggression and antisocial behavior with positive alternatives ART provides a coordinated three part training approach Prosocial Skills Anger Control Moral Reasoning This revision is designed to be more user friendly and teacher oriented It summarizes ART's outcome evaluations and discusses recent applications in schools and other settings Appendices include over 100 pages of guidelines checklists moral reasoning problem situations and more The Prosocial Gang Arnold Goldstein, Barry Glick, 1994-06-13 Goldstein and Glick's book title The Prosocial Gang seems a contradiction in terms but it describes a successful attempt to alter the antisocial behavior in New York An important element of the research program in my view was the principle upon which the study was based Respect and open communication underpinned the process and workers were given weekly supervision after having been consulted about how the project would work This ethos if followed through to the work with young people would have some effect on the outcomes if the young people were also consulted and treated with respect As an academic exercise the book is well laid out with a full reference section at the end I would recommend it to youth justice workers because of its practical application and scene setting of the wider world of young males Christina Vincent in LCCJ Newsletter The value of the work as a demonstration of what is possible is great Philip Priestly in Legal and Criminological Psychology This important book describes in detail an award winning gang intervention program Aggression Replacement Training The reduction in arrest rates as well as other results support the success of a multiyear project using the ART intervention approach with a series of very aggressive juvenile gangs in New York City Working with gangs as a unit the goal was to not only teach them anger control and other skills but do so in such a way that their real world reference group the gang was turned as much as possible into a prosocial rather than an antisocial support group This volume provides the reader with a thorough introduction to the history of gangs current gang demographics gang aggression and its etiology and a review and critique of the various types of gang interventions that have been and are being tried An invaluable resource for students as well as for practitioners dealing with gangs Four evaluations found that the program ART significantly improves

the quality of the youths interpersonal skills enhances their ability to reduce and control anger decreases the level of egocentricity and increases concern for the needs of others substantially decreases antisocial behaviors improves community functioning especially with peers and decreases criminal recidivism OJJDP Model Programs 1993 Juvenile Justice Bulletin

Aggression Replacement Training William M. Fullerton,2004 Aggression Replacement Training Stephanie Torchin,2003 The Aggression Replacement Training Program ART is an approach to reduce aggression in Young Offenders This program was implemented with a sample of youths on probation and living in the community N 21 The goal was to evaluate the efficacy of the program and to measure changes in aggression skill acquisition and recidivism rates A quasi experimental nonequivalent control group design was used The Aggression Questionnaire and Skillstreaming Checklist were the main source of data and results were compared pre and posttest Recidivism rates were determined six months after the start of the program An improvement in aggression scores was found in the ART sample but this was not statistically significant Only 5.8% of the total sample that had recidivated committed an aggressive crime Recommendations are made to maximize the efficacy of the ART program for the future *Student's Perceptions of the Effects of Aggression Replacement Training Skills* Margaret Ameday,2000 **Anger-Related Disorders** Eva L. Feindler,2006-04-11 In this ground breaking exploration a glittering array of specialists investigate how and why anger is viewed as a secondary emotion by most clinical

theories and practitioners and seeks to answer the following questions What are anger related disorders What do they have in common and how are they different How do we treat the various anger related disorders Drawing on one case study the top notch contributors each present a different method of treatment for anger related disorders By taking into consideration the variety of perspectives and treatments available for anger related disorders this book provides an overview of how clinicians can implement each of these treatments as well as combine treatments to provide a tailored therapy for each individual client
