**Environmental Gerontology in Europe and Latin America** Diego Sánchez-González,Vicente Rodríguez-Rodríguez,2015-11-03 This book looks at the relationships between the physical social environment and the elderly in Europe and Latin America from the Environmental Gerontology perspective and through geographical and psychosocial approaches It addresses the main environmental issues of population ageing based on an understanding of the complex relationships adjustments and adaptations between different environments home residence public spaces landscapes neighbourhoods urban and rural environment and the quality of life of the ageing population associated with residential strategies and other aspects related to health and dependency The different levels of socio spatial analysis are also explored macro urban and rural environments regions and landscapes meso neighbourhood public space and micro personal home and institution New theoretical and methodological approaches are proposed to analyse the attributes and functions of the physical social environment of the elderly as well as new ways of living the ageing process All will have to respond to the challenges of urbanisation globalisation and climate change in the 21st century Also the different experiences and challenges of public planning and management professionals involved with the growing ageing population are presented and will require greater association and collaboration with the academic and scientific fields of Environmental Gerontology

**The Challenges of Caregiving: Seeing, Serving, Solving** Rick Caracciolo,2019-08-20 Man s perception and how to accept aging has not changed dramatically since the beginning of time or over the last 220 years as man s life expectancy has increased Man is not a stagnant being and as Bathauer notes Psychologist tell us that all of life is made up of continuous changes from childhood all the way to old age The last twenty years of life the stage we call old age brings about almost as many changes as the first twenty years Changes in the latter part of life are usually more than all the changes during the first

twenty years of life because they carry the threat of loss disability or other degenerative conditions Christian counselors are trained in the spiritual and general mental health aspects of aging Caregivers and family members usually receive their training on the job as a caregiver As the graying of America continues at an accelerated rate the Christian counselor pastor and caregiver are going to need the tools and resources to counsel and assist in this area Aging will be an area which expands into additional areas that will affect everyone in some manner The Christian counselor pastor and caregiver can benefit both professionally and personally by having an understanding of what caregiving is and is not Also having the knowledge of where to retrieve useable and beneficial information is a blessing to all It helps to reassure that all involved during this very stressful time period and when major decisions might need to be made to know that there is applicable information at hand By having this knowledge it will allow the counselor and caregiver to truly get a better understanding of the aging person He is now able to help in a spiritual mental and physical dimension Again it is not expected that the counselor pastor and caregiver will become a specialist in aging or a gerontologist The expectation is that the reader will find helpful information as a caregiver and counselor
