Aging Health And Behavior:

Aging, Health, and Behavior Marcia G. Ory, Ronald P. Abeles, Paula D. Lipman, 1992 Drawing from both European and North American experiences this volume presents basic and applied research on ageing health and behaviour It points out the important role of individual behaviours societal conditions and public policies for determining the health of older people today and in the future The contributors explore the influence of age and ethnicity on health and behaviour coping with chronic illness and disability the effect of stress on illness disease prevention and health promotion and the implications for public policy *Aging, Health Behaviors, and Health Outcomes* K. Warner Schaie, Dan Blazer, James S. House, James A. House, 2013-12-16 This volume is the fourth in a series designed to facilitate inter disciplinary communication between scientists concerned with the description of societal phenomena and those investigating adult development As such it contains a compilation of papers presented at an annual conference held at the Pennsylvania State University These essays by sociologists and epidemiologists deal with the impact of disease and health outcomes with advancing age and are critiqued by members of related disciplines In addition there are overviews as well as specific discussions about the impact of cancer depression and cardiovascular diseases upon psychosocial functions **Aging and Male Sexuality** Raul C. Schiavi, 1999-06-17 Awareness of the importance of sexuality and its disorders in the aging population is increasing as the proportion of older people increases Based in part on the author s clinical experience and research at Mount Sinai Medical Center in New York this book presents an up to date overview of the sexuality of aging men in health and illness within a multidimensional conceptual framework It takes into account physiological psychological interpersonal and social influences The book also discusses the impact of medical illness psychopathology and drugs with a review of coping strategies in shaping individual sexual responses to aging and disease The author incorporates many case studies and vignettes and devotes a chapter to the sexuality of older gay men A balanced account of medical and psychosocial evaluation and treatment concludes the book which will be of broad interest to clinicians and students interested in sexuality and aging **Handbook of Communication and Aging Research** Jon F. Nussbaum, Justine Coupland, 2004-04-12 This second edition of the Handbook of Communication and Aging Research captures the ever changing and expanding domain of aging research Since it was first recognized that there is more to social aging than demography gerontology has needed a communication perspective Like the first edition this handbook sets out to demonstrate that aging is not only an individual process but an interactive one The study of communication can lead to an understanding of what it means to grow old We may age physiologically and chronologically but our social aging how we behave as social actors toward others and even how we align ourselves with or come to understand the signs of difference or change as we age are phenomena achieved primarily through communication experiences Synthesizing the vast amount of research that has been published on communication and aging in numerous international outlets over the last three decades the book s contributors include scholars from North America

and the United Kingdom who are active researchers in the perspectives covered in their particular chapter. Many of the chapters work to deny earlier images of aging as involving normative decrement to provide a picture of aging as a process of development involving positive choices and providing new opportunities. A recurring theme in many chapters is that of the heterogeneity of the group of people who are variously categorized as older, aged, elderly, or over 65. The contributors review the literature analytically in a way that reveals not only current theoretical and methodological approaches to communication and aging research but also sets the future agenda. This handbook will be of great interest to scholars and researchers in gerontology, developmental psychology, and communication, and in this updated edition will continue to play a key role in the study of communication and aging.

Aging and Human Motivation Ernest Furchtgott, 2013-03-14. I first met Ernest Furchtgott twenty-five years ago after joining the faculty of the College of Social Work at the University of South Carolina. At that time, Ernie chaired the Department of Psychology. In the following three years, we collaborated with an Academic Committee on Gerontology in conceptualizing and shaping the University's Certificate of Graduate Study in Gerontology Program, guiding it to final approval by the South Carolina Commission on Higher Education. For twenty years, we team-taught our graduate-level course, Psychosocial Approaches to Gerontology, involving colleagues from related disciplines. Over the years, we examined and jointly graded hundreds of research posters prepared by our graduate students in gerontology as their final course requirement. Several years ago, Ernie formally retired from the university. He instantly agreed to my request that he continue teaching the psychology of aging portion of our interdisciplinary course. On campus nearly every day since retirement, Ernie frequently telephoned to discuss recent articles

in The Gerontologist or a paper presentation that had excited him at the Gerontological Society's annual scientific meeting. He maintained a clear presence in the academic community.

Handbook of Aging and the Social Sciences Robert H. Binstock, Linda K. George, Stephen J. Cutler, Jon Hendricks, James H. Schulz, 2011-05-05. The Handbook of Aging and the Social Sciences Sixth Edition provides a comprehensive summary and evaluation of recent research on the social aspects of aging. The 25 chapters are divided into four sections discussing Aging and Time, Aging and Social Structure, Social Factors and Social Institutions, and Aging and Society. Within this context, aging is examined from the perspectives of many disciplines and professions including anthropology, bioethics, demography, economics, epidemiology, law, political science, psychology, and sociology. The Sixth Edition of the Handbook is virtually 100% new material. Seventeen chapters are on subjects not carried in the previous edition. Seven topics were carried over from the previous edition but written by new authors with fresh perspectives and brought up to date. Some of the exciting new topics include social relationships in late life, technological change and aging, religion and aging, lifestyle and aging, perceived quality of life, economic security in retirement and aging, and the law. There is also a greater emphasis on international perspectives, particularly in chapters on aging and politics, diversity and aging, and immigration. The Handbook will be of use to researchers and professional practitioners working with the aged. It is also suitable for use as a course text for graduate and advanced undergraduate courses on aging and the social sciences.
