Conversations Gerald Kaufman,2013-05-07 In this timely book family counselors Gerald and Marlene Kaufman urge adult children and their parents to have direct conversations about the decisions that lie ahead as parents age The Kaufmans suggest that families use their parents retirement as the benchmark for having the first discussion about their parents plans for the next phase of their lives The Kaufmans point out that most families wait until they re faced with a crisis before having these conversations The big questions facing aging adults are 1 Where should they live as they become less able to care for a property 2 How will they manage their finances so that they are as prepared as possible to meet their needs as they age Are they ready to invite one or more of their children to become their partners in making financial decisions 3 Are they ready to invite one or more of their children to become their partners in making their medical decisions 4 How can parents and children work together in determining when it s no longer safe or wise for the parents to drive 5 What end of life decisions should parents be prepared to make What is the best way to have those discussions Necessary Conversations is filled with

Robinson, Teresa L. Thompson, 2013-05-13 This text employs a communication perspective to examine the aging process and the ability of individuals to adapt successfully to aging. It continues the groundbreaking work of the first edition emphasizing a life span approach toward understanding the social interaction that occurs during later life. The edition provides a comprehensive update on the existing and emerging research within communication and aging studies and considers such topics as notions of successful aging, positive and negative stereotypes toward older adults, and health communication issues. It raises awareness of the barriers facing elderly people in conversation and the importance such conversations have in elderly people's lives. The impact of nonrelational processes such as hearing loss are considered as they impact relationships with others and affect the ability to age successfully. The book is organized into 14 chapters. Each chapter is written so that the reader is presented with an exhaustive review of the pertinent and recent literature from the social sciences. As in the first edition, when the literature is empirically based, the communicative ramifications are then discussed. Readers of this volume will gain greater understanding of the importance of their communicative relationships and how significant they remain across the life span. Developed for students in communication, psychology, nursing, social gerontology, sociology, and related areas, *Communication and Aging* provides important insights on communication to all who are affected by the aging process.
