CONTRACT LAW A COMMONWEALTH CARIBBEAN CASE BOOK Timothy A.

Affonso, 2013-11-19 Contract Law A Commonwealth Caribbean Case Book focusses on contract law as articulated by the jurists of the Commonwealth Caribbean region Case law from across the region has been combed to source the cases identified in this text The jurisdictions from which the cases have emanated span the full breadth of the Commonwealth Caribbean region The quality of the judgments referenced and the clarity of expression of the legal principles by our regional

jurists should greatly assist the young law student in his journey through this interesting area of law The Caribbean jurisprudence in the area of contract law operates within statutory and common law boundaries The absence of statutory intervention in some situations and the presence of legislation in others makes this area of law unique in its operation While it is important for students to be able to conduct research there is a need for Commonwealth Caribbean resource material This book seeks to achieve this objective The wide body of contractual principles have been categorised into identifiable elements of contract law so as to guide a student through this vast area of law I hope to underscore the essential nature of contract law to not only the law student s arsenal of legal expertise but also to his eventual practice of law It is hoped that this book can assist in developing a genuine interest and understanding of contract law

Making Climate Lawyers Kimberly K. Smith, 2024-04-11 Why did it take so long for American law schools to start teaching about climate change Although most environmental law professors were aware of climate change by 1990 it took nearly fifteen years for them to incorporate the topic into their curriculum In her innovative new work Kimberly K Smith explores how American environmental law professors have addressed climate change identifying the barriers they faced how they overcame them and how they created climate law as a domain of legal specialization Making Climate Lawyers explores the history of why American law schools were resistant to teaching about climate change and how that changed over the course of a forty year period resulting in law schools across the country incorporating climate change into their curricula with many even establishing centers on the environment Smith challenges dominant explanations of why the United States was slow to develop climate policy it wasn t just political opposition or short sightedness Creating climate legal professionals required changing the fundamentals of legal education Based on dozens of interviews with faculty and students Making Climate Lawyers fills a gap in the literature on the intellectual history of climate change most of which focuses on the history of climate science Smith focuses instead on how the climate problem fits or doesn t fit into the structure of American law She uses this story as a lens through which to understand both the

transformation of legal education since the 1980s and the nature of climate change as a policy problem Cases and Materials on Water Law Frank J. Trelease, George A.
