Alternative Uses of Highly Erodible Agricultural Land ,1988 Alternative and Novel Livestock Feed: Reducing Environmental Impact Francesco Serrapica,Damiano Cavallini,Massimo Todaro ,Alberto Stanislao Atzori,Alessandro Vastolo ,Isa Fusaro,2024-07-29 Livestock production systems are generally considered to have various negative environmental impacts including nutrient leaching and a significant contribution to global warming In this respect the reduction of gas or ammonia emissions can be achieved through improved efficiency in the choice of feedstuffs The use of alternative feeds or additives can contribute to a more energy efficient ration with lower emissions Such strategies can contribute to improved animal production and health status Studies have reported that feed additives such as nitrogen containing compounds probiotics prebiotics and plant extracts significantly reduce ruminant methane Moreover research suggested that fruit pomaces could be a low cost fibre source in poultry nutrition and that the inclusion of orange pulp in pigs diets can reduce the potential ammonia and methane emissions To properly evaluate the most adequate reuse strategy it is necessary a specific life cycle assessment for each co product *Integrative Biological Control* Yulin Gao,Heikki M. T. Hokkanen,Ingeborg Menzler-Hokkanen,2020-08-18 This book is the first to integrate biological control into a conceptual framework ecostacking uniting all aspects of biological control and ecosystem services In 2018 the First International Congress of Biological Control was organised and held in Beijing China The chapters highlight some of the achievements presented at the congress worldwide Of particular significance are the numerous contributions by Chinese researchers illustrating the remarkable progress made on developing and adopting multiple biological control strategies over vast agricultural areas largely replacing chemical pesticides for sustainable agricultural and horticultural production In many parts of the world including Europe fragmented research based on short term funding has been unable to answer to the needs to develop sustainable long term solutions to crop protection while colleagues in China have been successful in implementing programs that exemplify the power of the ecostacking approach Key contributions by European and US specialists combined with the expertise and experiences by the Chinese contributors comprise the building blocks for the integration of biological control approaches into the overall frame of ecostacking This book will lead the way to a broader integrated adoption of biological control techniques in sustainable pest disease and weed management supporting also the functioning of other key ecosystem services Chapter 2 of this book is available open access under a CC BY 4.0 license at link.springer.com Public-Private Partnerships and Responsibility under International Law Lisa Clarke,2014-03-21

Partnerships between the public and private sectors are an increasingly accepted method to deal with pressing global issues such as those relating to health. Partnerships comprised of states and international organizations, public sector and companies, non governmental organizations, research institutes and philanthropic foundations, private sector are forming to respond to pressing global health issues. These partnerships are managing activities that are normally regarded to be within the domain of states and international organizations such as providing access to preventative and treatment measures for certain diseases or improving health infrastructure within certain states to better manage the growing risk of disease. In the shadow of the success of these partnerships lies however the possibility of something going wrong and it is to this shadow that this book sheds light. This book explores the issue of responsibility under international law in the context of global health public private partnerships. The legal status of partnerships under international law is explored in order to determine whether or not partnerships have legal personality under international law resulting in them being subject to rules of responsibility under international law. The possibility of holding partnerships responsible in domestic legal systems and the immunity partnerships have from the jurisdiction of domestic courts in certain states is also considered. The obstacles to holding partnerships themselves responsible leads finally to an investigation into the possibility of holding states and or international organizations as partners and or hosts of partnerships responsible under international law in relation to the acts of partnerships. This book will be of interest to those researching and working in areas of global governance especially hybrid public private bodies, the responsibility under international law of states and international organizations and also global health. It provides doctrinal clarification and practical guidance in a developing field of international law. From D W Thorpe Advances in PGPR Research Harikesh Bahadur Singh, Birinchi K Sarma, Chetan Keswani, 2017-11-24 Rhizosphere biology is approaching a century of investigations wherein growth promoting rhizomicroorganisms PGPR have attracted special attention for their ability to enhance productivity profitability and sustainability at a time when food security and rural livelihood are a key priority. Bio inputs either directly in the form of microbes or their by products are gaining tremendous momentum and harnessing the potential of agriculturally important microorganisms could help in providing low cost and environmentally safe technologies to farmers. One approach to such biologically based strategies is the use of naturally occurring products such as PGPR. Written by an international team of experts this book considers new concepts and global issues in biopesticide research and evaluates the implications for sustainable productivity. It is an invaluable resource.
