What Price Food? Paul Streeten, 2016-01-03 The starting point of Paul Streeten's book is the dilemma faced by policy makers in many developing countries should the price of food be high in order to stimulate production or low in order to prevent poor food buyers from starving The author goes on to discuss the role of prices in the light of these and other objectives It is the work of one of our wisest scholars on what I consider to be the key policy issue for economic development in the 1980s this provocative essay will be required reading for anyone working on agricultural price policy C Peter Timmer It provides solid and practical guidance to scholars and decision makers It is lucid balanced and above all useful Robert Klitgaard Paul Streeten is well known for his gift of explaining the pros and cons of difficult policy issues in a clear simple and realistic way appealing to policy makers students and the wider development community as well as to academic colleagues This gift is fully displayed in his new book and readers are bound to emerge with a better awareness of the conflicts and policy reforms which are involved H W Singer [Agricultural Policies in Developing Countries](#) Frank Ellis, 1992-01-30 This book is designed for undergraduate and graduate students taking courses related to agricultural policy agricultural economics or rural development in developing countries *Agricultural Price Policies and the Developing Countries* George S.
