Holcomb,National Agricultural Statistics Service,2013-01-11 Agricultural Statistics is published each year to meet the
diverse need for a reliable reference book on agricultural production supplies consumption facilities costs and returns Its
tables of annual data cover a wide variety of facts in forms suited to most common use The historical series in this volume
have been generally limited to data beginning with 2001 or later Statistics presented in many of the tables represent actual
counts of the items covered Most of the statistics relating to foreign trade and to Government programs such as numbers and
amounts of loans made to farmers and amounts of loans made by the Commodity Credit Corporation etc are data of this type
A large number of other tables however contain data that are estimates made by the Department of Agriculture The
estimates for crops livestock and poultry made by the U S Department of Agriculture are prepared mainly to give timely
current State and national totals and averages They are based on data obtained by sample surveys of farmers and of people
who do business with farmers The survey data are supplemented by information from the Censuses of Agriculture taken
every five years and check data from various sources Being estimates they are subject to revision as more data become
available from commercial or Government sources Unless otherwise indicated the totals for the United States shown in the
various tables on area production numbers price value supplies and disposition are based on official Department estimates
They exclude States for which no official estimates are compiled STATISTICS OF GRAIN AND FEED This chapter contains
tables for wheat rye rice corn oats barley sorghum grain and feedstuffs Estimates are given of area production disposition
supply and disappearance prices value of production stocks foreign production and trade price support operations animal
units fed and feed consumed by livestock and poultry STATISTICS OF COTTON TOBACCO SUGAR CROPS AND HONEY In
addition to tables on cotton tobacco sugar and honey this chapter includes tables on fibers other than cotton and syrups
Cottonseed data however are in the following chapter on oilseeds fats and oils STATISTICS OF VEGETABLES AND MELONS
This chapter contains statistics on potatoes sweet potatoes and commercial vegetables and melons For potatoes and sweet
potatoes the estimates of area production value and farm disposition pertain to the total crop and include quantities
produced both for sale and for use on farms where grown Potato statistics are shown on a within year seasonal grouping of
winter spring summer and fall crops by States Some States have production in more than one seasonal group For processing
vegetables the estimates of area production and value for each of 8 crops relate to production used by commercial canners
freezers and other processors except dehydrators These estimates include raw products grown by processors themselves and

those grown under contract or purchased on the open market This production and the actual area harvested are not duplicated in the fresh market estimates for the same commodities The production of those vegetables used for processing for which regular processing estimates are not made is included in the fresh market estimates The processed segment of production for asparagus broccoli and cauliflower combined with fresh market production during the year is published at the end of the season separately In 2000 estimates were added for collard greens kale mustard greens turnip greens okra chili peppers pumpkins radishes and squash In 2002 estimates for fresh market lima beans beets for canning Brussels sprouts cabbage for kraut eggplant escarole endive collard greens kale mustard greens turnip greens okra and radishes were discontinued Additionally States were removed from the program for certain commodities For details on the 2002 program changes see the following website <http://www.usda.gov/nass/events/programchg/vegprogchgs.htm> STATISTICS OF FRUITS TREE NUTS AND HORTICULTURAL SPECIALTIES For most fruits production is estimated at two levels total and utilized Total production is the quantity of fruit harvested plus quantities which would have been acceptable for fresh market or processing but were not harvested or utilized because of economic and other reasons Utilized production is the amount sold plus the quantities used on farms where grown and quantities held in storage The difference between total and utilized production is the quantity of marketable fruit not harvested and fruit harvested but not sold or utilized because of economic and other reasons Production relates to the crop produced on all farms except for apples and strawberries In accordance with Congressional enactment the Department's estimates of apple production since 1938 have related only to commercial production The estimates for strawberries cover production on area grown primarily for sale Statistics on utilization of fruit by commercial processors refer to first utilization not necessarily final utilization For example frozen fruit includes fruit which may later be used for preserves The price shown for each crop is a marketing year average price for all methods of sales Prices for most fresh fruit are the average prices producers received at the point of first sale commonly referred to as the average price as sold Since the point of first sale is not the same for all producers prices for the various methods of sale are weighted by the proportionate quantity sold For example if in a given State part of the fruit crop is sold f o b packed by growers part sold as bulk fruit at the packinghouse door and some sold retail at roadside stands the fresh fruit average price as sold is a weighted average of the average price for each method of sale The annual estimates are checked and adjusted at the end of each marketing season on the basis of shipment and processing records from transportation agencies processors cooperative marketing associations and other industry organizations The estimates are reviewed and revised if necessary at 5 year intervals when the Census of Agriculture data become available The Department's available statistics are limited to the major tree fruits and nuts and to grapes cranberries and strawberries and exclude some States where census data indicate production is of only minor importance STATISTICS OF HAY SEEDS AND MINOR FIELD CROPS This chapter deals with hay pasture seeds and various minor field crops STATISTICS OF CATTLE HOGS AND SHEEP This chapter contains information
