Aids And Men Taking Risks Or Taking Responsibility:

AIDS and Men Martin Foreman, 1999 The global AIDS epidemic is driven by men Men have more opportunity to contract and transmit HIV men usually determine the circumstances of intercourse and men often refuse to protect themselves and their partners Even if no more than one in four men endangers themselves and their female or male partners this represents hundreds of millions of men whom is appears regularly act without thought for their partners Can men be persuaded to change their behaviour How do concepts of masculinity affect risks and responsibilities in relation to the epidemic The first section of this book examines the relationship between men s actions and AIDS world wide the impact of those actions on men and women and initiatives designed to help men protect themselves and their partners The second section written by journalists from eleven countries in the Americas Africa Asia and Eastern Europe illustrates many different aspects of that relationship from machismo in Mexico to drug injection in Russia from men in prison in Brazil to men living with HIV in Thailand from men as fathers in the Ivory Coast to men who have sex with men in Kenya Men undoubtedly take risks in relation to HIV Whether or not they should also take responsibility for transmission of the virus and how they can do so are questions that cannot be easily resolved This book provides some insights that allow a greater understanding of the issue

Socio-political and Psychological Perspectives on South Africa Christopher R. Stones, 2001 South Africa is a society that sadly has been divided against itself even at the best of times Beginning with the initial advent of colonialism on the southern tip of the African continent through to the later spawning of apartheid as well as in its nascent democracy divisions have continually been manifest in varying form and content along racial ethnic class religious language political or other socio economic and cultural lines Unlike most societies South Africa is a natural laboratory for psycho social research yet it has been foreign researchers who have conducted most of the behavioural studies on the human condition in the country South African psychologists seem to have steered clear of involvement in researching any major policy impact especially in recent times when the re shaping of South African society has been at its height Each of the authors in this book is South African and appropriately has lived through the transition in South Africa and has attempted to understand the changes at both professional and personal levels The contributors were each asked to write a chapter that would explore the South African socio political terrain from within their fields of expertise and so help others navigate the uncharted future with less trepidation

From Boys to Men Tamara Shefer, 2007 The current emphasis in research and education on women and girls is fraught with problems It has raised a concern that boys and men should be included in research and intervention work on gender equality and transformation As a result academics with a background of many years of work in women s and gender studies undertook a research project focusing on the construction of masculinities among young men From Boys to Men was born out of this project This highly original work arises from the conference From Boys to Men held in January 2005 It represents the work of some of the best known theorists and researchers in masculinities and feminism in South Africa on the continent and internationally The subjects covered are based on rich ethnographic studies mostly in South Africa but also elsewhere in Africa Acknowledging that there are multiple versions of masculinity and that some are more valued than others this book is concerned with documenting both hegemonic discourses on masculinity as well as resistances and challenges to dominant forms of being a boy or man in different contexts of space and time From Boys to Men provides valuable material for those working with issues of gender identity and power and will sharpen understanding of males inform community based interventions and facilitate theory building This impressive collection of research on men boys and masculinities would have been impossible just a generation ago It took the worldwide impact of the women s liberation movement and the many feminisms that have since developed to bring gender into focus and to bring men into focus as participants in a gender system Raewyn Connell Professor at the University of Sydney author of Masculinities 1995 Given the extant paucity of research and literature on masculinities this book will undoubtedly prove to be an invaluable resource for scholars in the field of gender studies The editors of the volume should be commended for this timely well constructed and significant contribution to the literature on masculinities studies both in South Africa and internationally Norman Duncan Chair of Psychology University of the Witwatersrand Setting this collection apart from existing scholarship on masculinities in South Africa is its interrogation of the gendered rhetoric of boyhood and manhood in the context of HIV Aids This is a multilayered and rich collection that suggests masculinities have the potential to be unmade and remade The volume usefully opens up new avenues of analysis telling us that masculinities are always in process under negotiation contradictory for ever in crisis

Bannon, Maria Correia, 2006-01-01 This book is an attempt to bring the gender and development debate full circle from a much needed focus on empowering women to a more comprehensive gender framework that considers gender as a system that affects both women and men The chapters in this book explore definitions of masculinity and male identities in a variety of social contexts drawing from experiences in Latin America the Caribbean and sub Saharan Africa It draws on a slowly emerging realization that attaining the vision of gender equality will be difficult if not impossible without changing the ways in which masculinities are defined and acted upon Although changing male gender norms will be a difficult and slow process we must begin by understanding how versions of masculinities are defined and acted upon *The Shriver Report: A Woman's Nation Takes On Alzheimer's* Maria Shriver, 2010-10-19 The Shriver Report A Woman's Nation Takes on Alzheimer's will be the first comprehensive multi disciplinary look at these questions at this transformational moment The Report will
